The Beautiful Grafted Blue Spruce.

BEAUTIFUL GRAFTED BLUE SPRUCE

This tree stands supreme in the majestic beauty of its foliage, form and color. This special offer is made because we want you to know this wonderful tree as we do—the most ornamental tree in existence. It excites the wonder and admiration of all. The bright gorgeous silvery blue tints, when flashed in the sunlight, afford a wonderful aspect. It grows to perfection in all parts of the country, and is absolutely hardy. Thousands took advantage of this wonderful offer last season and many expressed great surprise at the magnificence of the tree. This appreciation leads us to again feature this special offer this season. The illustration shows the tree dug with ball of earth and burlapped ready to box and ship to you.

Special Offer No. 100

1 Grafted Blue Spruce } \$1.35
1 to 1½ ft. B. & B.

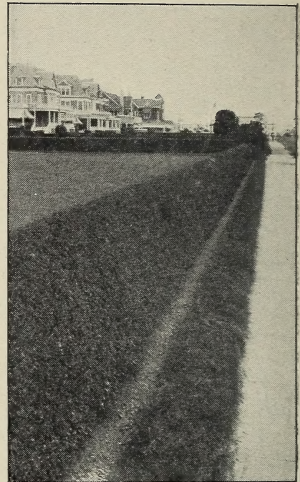

HILL'S HARDY HEDGE COLLECTION AMoor RIVER PRIVET

This is conceded to be the best plant for hedge purposes grown. It is partially Evergreen and as an ornamental hedge it is beautiful throughout the year. It is absolutely hardy, of easiest culture, and will grow in any soil or situation. Of rapid growth and makes a perfect hedge in two seasons. Can be trimmed to any shape or height. Plant 18 inches apart.

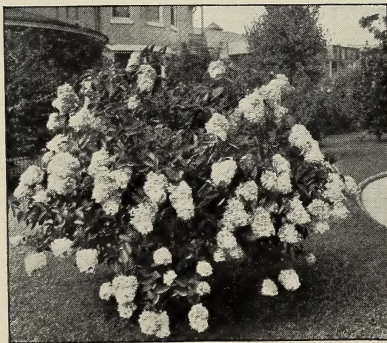

Special Offer No. 101 } 50 Amoor River Privet } \$2.90
1½ ft.

Special Offer No. 102. Hill's \$1.00 Shrub Collection

Six beautiful Flowering Shrubs, 2 of each variety described below. Large, strong 3-year plants for immediate effect, 1½ ft. high.

Amoor River Privet Hedge.

Hydrangea.

HYDRANGEA.

One of the best ornamental shrubs. Blossoms profusely throughout July and August. The large, massive cone-shaped flowers often measure ten inches in length. See illustration.

SPIREA, or BRIDAL WREATH. A splendid new garden shrub entirely hardy in any climate and the most beautiful of all. Immense snow-white blossoms, pure white flowers borne in elegant plume-shaped clusters all over the plant as shown in illustration, page 21. We believe this to be the finest of all Spireas, and one of the most satisfactory shrubs to be had.

GOLDEN MOCK ORANGE. The Golden Mock Orange is one of the most attractive and beautiful shrubs we grow. Of vigorous habit, forming medium-sized, well-formed, compact bushes. The leaves are a rich golden color, and contrast beautifully with the green of other shrubs. See illustration, page 23.

Combination Offer No. 103

You can order any one of the above special offers, or as many as you want, but we will ship all three to you for the exceptionally low price of **\$4.90**. This is almost an unheard of offer, and we are only enabled to do it because of our immense and wonderful stock; furthermore, we want to become acquainted with you.

A Special Word. We invite your special attention to the fact that in this catalog all illustrations are made from actual photographs of stock as it stands in our own grounds, or on the grounds of our customers who have purchased stock from us. In every case therefore, our illustrations give an accurate idea of the appearance of the trees, shrubs and plants shown. You can depend upon the pictures and descriptions in Hill's catalogs, just as you can depend upon the quality of Hill's trees.

We cannot change or alter the SPECIAL OFFERS at prices quoted.

A WORD OF APPRECIATION.

We wish here to express sincere thanks to our many friends and patrons, who have written kind words relative to the quality of stock and treatment they have received from us the past season. We greatly appreciate these expressions of confidence and shall endeavor to maintain the reputation they have so kindly given us.

QUALITY.

The name of D. Hill, has come to be synonymous with "High Quality" in Trees, Shrubs and Plants. Over half a century of conscientious effort, unbounded enthusiasm, a close study of the value of every new specie introduced; and above all an ambition to make new friends and keep the old, has been the method by which this high position has been reached.

YOUR SUCCESS WITH OUR STOCK

is a matter in which we are mightily interested. Therefore we endeavor to do everything reasonable within our power to help you succeed with the stock we send you, because we love trees and want you to enjoy them also. *No firm is more careful in filling orders: we use every reasonable means to learn the customers' wishes without delaying the shipment.* Your interests are our interests, and we present you this 1910 catalog confident that we merit your trade, and assure you of the best treatment, whether the order is large or small.

SUGGESTIONS TO ALL WHO BUY.

Order Early. You will find that it pays—no waiting, no worry, and you get better served, so be sure to allow yourself plenty of time. In ordering please use printed envelope and order sheet enclosed. Others will be sent upon request.

Our Terms are cash with order, except when satisfactory bank reference is given, when we will gladly open an account. Money may be sent at our risk if forwarded by Post Office Money Order, Express Money Order, Bank Draft, or in Registered Letter. Do not use order sheet for correspondence. As a matter of economy, both to our customers and ourselves, we prefer not to accept orders for less than 50 cents.

We always do better than we promise in the way of extra trees and plants so that when the order will at all afford it, we add to it something gratis, often a choice or new kind.

GET YOUR OWN TREES FREE

See 50 Great Bargain Sheet, and learn how to get 100 trees free. Thousands took advantage of our generous Club offer last year and got their own trees free.

Kindly send all orders, money and correspondence, plainly addressed to,

D. HILL, Evergreen Specialist
Dundee, Ill., U. S. A.

RELIABILITY · QUALITY

HILL'S HARDY EVERGREENS.

The varieties offered here are all those which have been time tested and proven **absolutely hardy and reliable**. Our long experience has taught us how to grow and root them, as well as how to dig, pack and ship them to all parts of the world with safety.

Seedlings and Transplants. We have designated our stock particularly the Evergreens, as **Seedlings** and **Transplants** which offers a wider range of selection in the size of the plants. **Seedlings** are two, three and sometimes four year old trees that have not been taken from the ground and replanted, coming directly from the original seed beds.

Transplants are trees which have been taken from the seed beds and replanted. Transplanting adds value to the tree by developing an abundance of fibrous roots. The trees become heavy and stocky.

Ball and Burlap. Trees designated **B & B** means, that they are dug with large ball of earth and burlapped, leaving the roots undisturbed. This in most cases absolutely guarantees their success. When planting

these trees it is not necessary to remove the burlap, simply cut the strings and place tree in position. Always water well after planting.

BALSAM FIR.

The oldest and best of fast growing Evergreens for windbreak and shelter planting, is the Balsam Fir. Tall, straight growing, with dark green foliage. An admirable tree for planting in the North and Northwestern States. Its extreme hardiness enables it to withstand the coldest of Winter winds and weather. The needles emit a pleasing fir odor.

Price:	Transplants	Each	100	Seedlings	100	1,000

					1.75	

HEMLOCK.

A beautiful Evergreen of graceful habit and unequalled for ornamental planting, but on account of the enormous demand the last few years has become quite scarce. For garden, lawn or park planting, this variety stands out as one of the best. Attractive at all seasons of the year, especially in the Spring and Summer when the new growth comes forth a delicate light green, soft and fern-like. It is one of the few Evergreens which thrives in a partial shade. Excellent for hedges responding readily to shearing and can be kept to any desired height or form.

DOUGLAS FIR.

A variety from the Rocky Mountains and always referred to as one of the most beautiful and valuable of American Conifers. Has strong, upright habit of growth, with beautiful soft green foliage upon long drooping branches. A rapid grower and exceedingly valuable for ornamental planting, either in groups or as single specimens, and much used for thick screens and windbreaks. Being perfectly hardy enduring extreme heat as well as extreme cold, it can be planted successfully in all portions of the country. Grows to large size often reaching a height of 50 to 60 feet.

Hemlock.

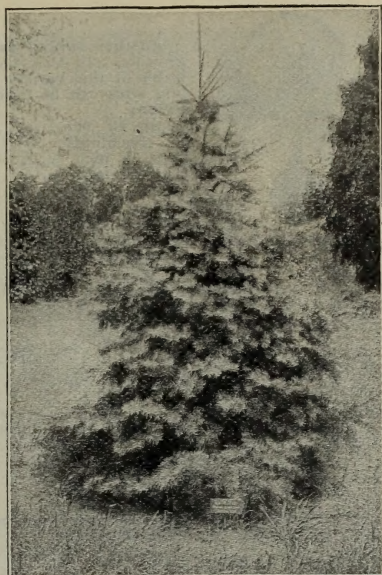

Douglas Fir.

CONCOLOR FIR.

A beautiful Evergreen from the Rocky Mountains, and in ornamental value, second only to the Blue Spruce. Its foliage is very striking varying in color from light green to deep soft blue, and is long, soft and graceful. In appearance it is entirely different from any other variety. Being a comparatively rapid grower, it soon matures into tall broad specimens of magnificent beauty. Indeed, it is today, without doubt, the most successful of all Firs, and has become so widely known and appreciated that it is planted extensively throughout European countries, where it is also very popular and much admired for its many sterling qualities. A tree perfectly hardy, even in the most exposed situations and long lived, reaching at maturity a height from 60 to 80 feet. They are evenly branched and shapely even when very young, and never loose their lower branches. Beautiful effects are produced by planting a group consisting of a combination of Concolor Fir, Blue Spruce and Douglas Fir, as their charming tints of blue contrast prettily and nothing could be more ornamental for lawn.

RED CEDAR.

A tall growing Evergreen, of remarkable hardiness and immensely attractive. It is one of the oldest and best known of the Evergreen family, growing in its various forms throughout the United States. Its rapid growth and extreme hardiness make it one of the most popular and widely planted trees we offer. For screening buildings or forming windbreaks it is indispensable. Long lived always retaining the bottom foliage. For middle-western and western States the Red Cedar is unsurpassed.

IRISH JUNIPER.

An upright formal growing Evergreen used only for ornamental planting. It is a most satisfactory tree for cemetery and garden use. Very dark green with delicate sharp pointed needles.

Price:	Transplants	Each	10	100		Transplanted	Each	10	100	
	18 to 24 inch	\$0.35	\$3.00	\$25.00	2 to 3 feet	\$0.75	\$7.00	\$60.00

SABINA JUNIPER.

A dwarf form of hardy Juniper with trailing or spreading branches, rarely attaining a height of over three feet, forming a flat crown several feet in diameter. With its fine dark green color, its unique beauty and attractiveness is unexcelled. There is such an air of gracefulness and lightness in the easy rounded curves of each little branchlet of this rare little tree that it commands the admiration of every lover of Evergreens. It is valuable for border planting in front of taller growing Evergreens and superb for planting in wild rocky landscape, or for covering unsightly features on a lawn. Several of these trees massed close together present an attractive appearance on account of their healthy vigorous, though dwarfish growth, and peculiar somber hued foliage. This variety is an introduction from southern Europe, and our stock of this specie, comprises strong well grown trees of extra quality.

Price:	Transplants	Each	10	100

PONDEROSA PINE.

A fine hardy species from the Rocky Mountains. One of the most reliable, fast growing Pines we offer, rapidly attaining a height of 75 to 100 feet. Will do well on any drained soil. It is one of the old reliable time tested Evergreens, having been used for windbreaks, shelters and groves for fifty years. A variety of inestimable value for planting in States of Nebraska, Kansas, Missouri, Oklahoma and the Dakotas.

Directions for Planting Windbreaks.

In planting trees for windbreak, success depends to a great extent upon the manner in which the ground is prepared to receive them. It should be carefully plowed or spaded as deeply as possible, and some rich compost or fertilizer added. If seedlings are used plant them from one to three feet apart in the row and the rows ten feet apart, and thin out when they begin to crowd. If Transplanted trees are used, five feet apart in the row, and the rows ten feet apart, is a good distance.

Three rows ten feet apart, breaking joints, make a very satisfactory windbreak. Plant the extra tall, fast growing varieties, (Pines), in the row forming the outside, medium growers (Spruce) in the middle row, with the low growing trees (Arbor Vite, Cedars, and Firs) to form the inside row. Hoe or cultivate thoroughly the first few Summers after planting especially during July, August and September. Water generously at frequent intervals during Summer.

WHITE PINE.

The White Pine is the grandest and most noble Evergreen found growing in the United States. Foliage long and soft green with a delicate tint of blue upon the under side of its needles. Grows tall stately and graceful in outline developing into handsome specimens, therefore valuable for ornamental planting. They are also especially recommended for windbreak, screen or shelter belt planting in exposed locations. Rapid in growth and extremely hardy, thriving equally well in all parts of the country, it is known as the King of the forests. The Dundee Nurseries specialize in White Pine, the seed beds of this variety alone covering an area of many acres. We grow them in all sizes from 4 to 6 inches up to ten feet in height, and can furnish them in any quantity up to ten million plants. Our stock of both Seedlings and Transplants is of extra high quality, being strong, stocky and bushy.

Forest Planting. Those wishing to purchase White Pine seedlings in large quantities, for reforestation purposes will confer a favor by writing for special quotations. Complete information regarding forestry, etc., can be obtained by writing the U. S. Bureau of Forestry, Washington, D. C.

SCOTCH PINE.

Scotch Pine is one of the hardiest of Evergreens. Of very rapid close growth when young. It has been planted more extensively than any other Evergreen on the cold prairies of our North and Northwestern States, where it thrives with immense success. Grows on any drained soil and is not affected by drying winds or hot sun. Good results are obtained by mixing it with other hardy Evergreens, for windbreaks, shelterbelts and screens.

Dear Sir: My Evergreens came all right. They are the finest lot of trees I ever saw. Thanks for the present of Spruce and extra Concolor. Every one of those I ordered last year grew and are looking fine.—Pomeroy Mather, Washington, Iowa.

White Pine.

Scotch Pine

American Arbor Vitae.

AMERICAN ARBOR VITAE.

(*Thuja Occidentalis*.)

There is no Evergreen either native or introduced which will endure so much hardship and grow on as great a variety of soils, even under adverse conditions as the Arbor Vitae. We have the largest and finest stock of this variety in the country. Owing to its compact appearance when sheared and its bright green color, it is without doubt the best tree for hedge purpose that grows. Remarkably rapid in growth and still not affected by the coldest of bleak wintry winds, it can be planted in the most exposed locations with entire success. When planted in groups or singly it grows tall and pyramidal, its beautiful flat fernlike branches overlapping each other forming a symmetrical specimen unsurpassed for rich beauty. It thrives with equal success, North, South, East and West, its many good qualities combining to make it the most valuable tree that grows.

Planting and Care of Evergreens.

The best results are secured by transplanting Evergreens in the Spring, especially is this true of the smaller sizes. However, Fall planting, if properly done, is attended with small loss. Do not let the roots become dry or exposed to the wind and sun, and if the weather is dry, dip the roots in water before planting. The size of the hole will depend upon the size of the tree to be planted, and it should be large enough to hold the clump of roots without crowding. If it occurs in digging that the surface soil is better quality than that found further down, as frequently happens, put a small quantity of this to one side and replace it in the hole before the tree is inserted. After adjusting the roots in the hole as nearly as possible in the position which they formerly occupied, fill the earth in gently and thoroughly around them, packing the soil firmly with the ball of your foot. As a finishing process, after filling in the hole and firming the soil well about the tree, apply as a mulch, several inches of well rotted straw, coarse manure or grass. Too much emphasis can scarcely be laid upon the importance of this last step. With Shade, Fruit and Ornamental trees it is possible to preserve a balance between top and roots by cutting back the former if the latter be injured, but this is not practical in dealing with Evergreens. To protect the roots against drying by exposure to sun and wind they must be carefully wrapped in a wet sack, piece of burlap or old cloth, even if moved only a short distance. If the soil is poor the trees will be benefited by having thoroughly rotted manure spaded into the earth about them, but this must not come in to direct contact with the roots, and fresh manure ought never to be used. Evergreens should be watered well during the months of July and August, as at that time they make new roots, and consequently need lots of moisture.

Dear Sir: The Arbor Vites that you shipped me on the 23rd just arrived and are beauties.—James Laque, Washburn, Texas.

Wind-breaks, Shelter-belts and Screens. Every country home should have its shelter-belt of Evergreens. Windbreaks are not meant for the sole use of Orchardists as was once thought, but should be so commonly planted as to protect every home exposed in the least to the ravages of wind and storm. The saving in fuel alone will defray the cost of planting material in a few years' time; nor need one wait a dozen years or even half so long for Evergreens to grow large enough to afford protection against piercing winds. Results may be secured in a comparatively short time by planting quite thickly, the superfluous trees to be removed from time to time as they encroach upon those which it is designed to leave for permanent shelter. Many an exposed barnyard, poultry run or apiary might be transformed into a place of genuine comfort for its inmates on wintry days, by planting along its Northern and Western sides, a row of White Pine, Norway Spruce, White Spruce or Arbor Vitæ and almost all of the Pines and a good many of the Firs are equally valuable for windbreak planting. A properly constructed windbreak is a valuable asset to any farm or country home, and is not only a distinct advantage to live stock as well as buildings, but it is also highly ornamental. Compare the illustration above with some of the farm homes you have seen utterly devoid of trees of any sort. Is it not safe to assume that the most pleasant place to live would be one surrounded by rows and groups of Evergreens? They certainly tend not only to protect the dwelling from the chilly blasts of Winter and thus greatly reduce the necessary expense of warming the house in Winter, but it is an acknowledged fact that trees planted about the home tend also to keep it cooler in Summer and surely the grateful shade and increased comfort that trees give both to man and beast are points that cannot be figured in dollars and cents, but assuredly they are a great advantage.

A Mixed Planting. Often a windbreak can be worked into general landscape effect and greatly enhance the beauty of home lawn or garden by informal groupings and combining different shades of color. Then an irregular shelter-belt of Evergreens becomes, with Elms, Maples, Lindens and other trees, a most charming addition to the landscape.

Dear Sir: I received a shipment of Evergreens from you 18 years ago, 130 trees in all and planted them for a windbreak; now they are all large and fine. I did not lose a single tree.—Henry Groupe, Marion, Iowa.

Dear Sir: Please quote lowest price per hundred for 2½ to 3 foot American Arbor Vitæ and Norway Spruce. The Spruce I bought of you ten years ago are beauties. Many times their cost would not buy them now.—J. E. Howard, Montrose, Mich.

HILL'S "FAVORITE" WINDBREAK COLLECTION.

Special Offer No. 106. Price \$5.00.

25 Norway Spruce 10 to 12 inch transplants.
25 White Pine 6 to 10 inch transplants.

25 American Arbor Vitæ 10 to 12 inch transplants.
25 White Spruce 8 to 12 inch transplants.

Norway Spruce.

Norway Spruce.

In describing the Norway Spruce which has been so abundantly and widely planted all over the United States, we feel that we are dealing with a tree already thoroughly well known to most people. Owing to its rapidity of growth and hardiness, together with the fact that it readily adapts itself to almost any soil, this variety has become a general favorite. There is scarcely a park, cemetery or farming community where it cannot be found in abundance. Its extremely rapid habit of growth recommends it as especially valuable where speedy results are desired. Its dense growth forms an almost impenetrable barrier to the sharp winds and frosts that cause great damage to fruit and stock. The Norway Spruce stands shearing well and is recommended highly for close hedges. Its great hardiness enables it to withstand the most rigid northern climate. Its gracefulness of outline, rapidity of growth and dark verdure, also render it particularly pleasing and well worthy of the popularity it holds as leader in the list of Evergreens. This variety is used for so many purposes and apparently it serves them all successfully. For dense shade on lawn, and for planting along line fences, walks, borders, drives, and around orchards, vegetable gardens, etc., it is unsurpassed. This wonderful variety is also much used for stock shelter, around barns, pig-pens, poultry runs, apiaries, etc., where their quick growth and masses of foliage combine to form a quick and permanent shelter. It is without doubt the easiest tree to transplant of the entire list, as when properly grown they naturally form a mass of splendid fibrous roots.

White Spruce.

The White Spruce is a native of the northern portion of the United States and Canada which guarantees its extreme hardiness. On account of its compact habit of growth, regular conical outline, and soft glaucous green color it has gained a popularity second only to the Norway Spruce and the charming color of the tree has made it a great favorite for ornamental planting especially when planted in a group with darker foliaged Evergreens, the contrast being delightful. The main reason however for the popularity of this tree is its value for use for practical purposes, such as windbreaks, shelter-belts, etc.

Black Hill Spruce.

No Evergreen is better adapted for general planting than the round, compact, evenly branched Black Hill Spruce. No tree adapts itself more readily to conditions. An Evergreen unsurpassed in beauty and at the same time one with a most rugged constitution. It is absolutely the hardiest of all Spruces. We recommend this variety very highly combining as it does both the qualities of ornament and utility to a high degree. Even the little fellows are stocky and compact. For ornamental plantings its attractive foliage makes it extremely valuable for park and lawn planting, which, in addition to its longevity and ease of culture surely entitles it to a position among the leaders. Of large growth, reaching height of 75 to 80 feet.

3 Norway Spruce	12 to 15 inch
3 White Spruce	12 to 18 inch
3 Black Hill Spruce	15 to 18 inch

Dear Sir: I have never had such fine Evergreens from any Nursery as you sent me last Spring. They came with a ball of earth around them apparently never knew they were moved.—J. W. Taylor, St. Paul, Minn.

Black Hill Spruce.

Blue Spruce (Picea Pungen).

The Dundee Nurseries have, for a number of years, given special attention to the growing of this beautiful Evergreen, and we take special pride in calling your attention to this King of Conifers, the Blue Spruce. This tree grows over a greater range of territory than any other member of the Evergreen family, and is without doubt, the most ornamental of all. They naturally form a perfectly shaped tree with an abundance of heavy foliage of a rich blue silver color, which flashes and sparkles in the sunlight. As we have made a specialty of this variety for many years, we have succeeded in building up a magnificent stock (without doubt the largest in the world) and in walking through our Nurseries one sees block after block of these wonderful trees in all sizes and stages of growth, perfect in form and color, which annually attract many visitors from all over the country. We offer three types of this wonderful variety—The Grafted Blue Spruce, the Colorado Blue Spruce and the Colorado Green Spruce.

Shipped with Soil. Blue Spruce are all dug in a special manner, leaving a neat ball of soil undisturbed about their roots, securely tied in burlap; such trees seldom die and always make a good growth the first year.

GRAFTED BLUE SPRUCE (KOSTER'S).

These are an absolutely true blue type of the Blue Spruce, every tree being perfect both in form and color. They are propagated by special workmen, expert grafters who carefully select the grafting wood, and perform the delicate operation. This all takes place under double glass in special greenhouses and entails a long and careful process of giving each tree special treatment every day. After the wounds heal they are planted out in nursery rows; nursed and cared for as tenderly as a child, cut, pruned trimmed, staked and transplanted at regular intervals until the tree has reached perfection in form and color.

White Tipped Juniper.

JUNIPERUS ELEGANTISSIMA LEE. A superb variety and fittingly described by the introducer as a real variegated Golden Juniper. Its foliage is remarkable, its branches taking a symmetrical drooping form, with color of dark, rich green tipped with bright golden. Long lived and hardy, growing to perfect form without shearing. Rarely exceeding 20 feet in height. Undoubtedly the greatest achievement of the past decade.

Price: Transplants Each 10
1½ foot B. & B.\$1.25 \$11.00

Juniperus Glauca.

Hill's Collection of Choice New and Rare Evergreens.

The varieties offered on this and ensuing pages are those which have been carefully selected from among thousands of varieties, fully tested as to hardiness and adaptability, and chosen for their remarkable characteristics of beauty and utility. Some are propagated by seed, the majority either by the grafting or layering process. Each tree has a record of over half a century of "Knowing How" behind it and the high reputation of Hill's quality to maintain. We need scarcely praise these attractive Evergreens for their beauty, for that is apparent to every one who plants and admires beautiful trees. Yet it is only during recent years that there has been a general awakening to the utility of these fine Evergreens, of our own and foreign lands, for lawn and garden decoration. France, Holland, Japan, China, New Zealand and other lands contribute Evergreens which rank foremost amongst the most prominent beautiful objects used for lawn decoration. Our stock consists of over one hundred varieties and your attention is drawn to the fact that they are all hardy. All are dug with ball of earth except where noted.

WHITE TIPPED JUNIPER. A broad pyramidal tree with dense foliage, growing 15 to 20 feet tall. This Juniper is one of the most attractive and useful of the entire list for lawn and garden planting. The foliage of its delicate upright branchlets is of a bright silvery glaucous color with just a slight greenish tinge the tips of which change abruptly into a soft creamy white color. It is certainly a sensational triumph in Conifer growing, the tree having unsurpassed beauty of a totally distinct character. Described by an eminent horticulturist as "a marvel of rich beauty." The tree is rapid in growth and after extensive trials and tests we find it absolutely hardy everywhere. Grows naturally to perfect form, and no clipping or shearing is necessary.

JUNIPERUS PROCUMBENS. This hardy creeping plant was introduced some years ago from the northern portion of Japan and as the name implies this splendid tree is of low growing, trailing or creeping form. It has filled a long felt want and it has so many good qualities that we are quite certain it will find place in the lawn or garden of every lover of beautiful trees. With its slender trailing branches and spreading foliage of deep somber green color, this charming little tree is unsurpassed in beauty. In season too its branches are covered with small, dark shining purplish colored berries which enhance its beauty to a wonderful extent. It is much used for terraces and rockeries and is also immensely attractive when placed in borders before taller growing Evergreens and Shrubs. It is a vigorous grower often extending along the surface of the ground to a distance of 7 to 8 feet, in every direction. Hardy in every section of the country and no matter where you live, they will give you perfect satisfaction. Our stock comprises perfectly grown specimens, round and evenly branched, the larger sizes being ten years old.

Price:	Transplants	Each	10
1 to 2 feet, broad B. & B.	\$1.75	\$15.00	
3 to 3½ feet, broad B. & B.	5.00	47.50	

JUNIPERUS GLAUCA. Again we desire to call your attention to this magnificent tree which maintains itself as one of the best that has ever been introduced into this country from Europe. From the standpoint of beauty, form and hardiness it is preeminently the "King" among Junipers. An Evergreen of the most beautiful type, it is perhaps the best known of all new varieties and is now widely planted throughout the United States, in all ornamental lawn and garden plantings. It grows very rapidly and assumes early an unusually graceful habit. The foliage is slender and pendent, yet vigorous, and a light silver blue in color, forming the most perfect round shapely tree imaginable. Add to the above points of superiority the sterling qualities of longevity and practical utility, we find Juniperus Glauca to be undoubtedly one of the best trees in the world for general planting. Our stock is extra choice of uniform shape and color.

JUNIPERUS JAPONICA AUREA.

The most interesting of all dwarf Junipers. Of remarkable beauty, and especially noted for its wonderfully rich, charming foliage, of a light golden color which pervades every portion of the tree. When quite young this variety is prostrate, and trails along the ground, but as it increases in age it gradually assumes a compact, conical form. There is no other tree in cultivation just like it, and is without doubt the most valuable production in the horticulture line Japan has ever given us. We do not know of one other plant having such a wealth of rich golden color; and would recommend every lover of the beautiful to introduce this hardy and lovely little Juniper into all their lawn and garden plantings.

ORIENTAL SPRUCE.

As an ornamental Evergreen, Oriental Spruce has long been a favorite with American planters on account of its regular conical form, slender delicate branches and deep green coloring. No Evergreen fits more readily into a small group or on lawns of limited space. On account of its straight pyramidal growth it requires little space, and develops to its best state of perfection within a small area. It is emphatically a hardy tree, not being affected in the least by snows and hard freezing. We recommend it as being especially fine for single specimen planting upon the lawn. Grows 20 to 35 feet high, a perfect pyramid in form, always retaining the branches around the base.

Price :	Transplants	Each	10
10 to 12 inch		\$0.25	\$ 2.00
1 foot, B. & B.		1.00	7.50
1½ to 2 feet, B. & B.		1.75	16.50

WEEPING NORWAY SPRUCE.

A most useful and ornamental Evergreen, growing to large size while its branches grow always in a drooping position, growing straight down and finally spreading out gracefully upon the ground around the base of the tree. This is always a popular tree. We sell them in quantities every year. It is widely planted as a lawn tree, for which purpose it is well adapted, always growing conical in form and requires little space. The Weeping Norway Spruce is robust and hardy, not effected by the most severe Winter weather, adapting itself to soils and conditions very readily. As will be seen from the illustration the most striking characteristic of this variety is its odd form of growth. The branches take on a decided droop, the topmost limbs often growing directly downward.

Weeping Norway Spruce.

Thuya Globosa Nova "New."

GEO. PEABODY'S GOLDEN ARBOR VITÆ. A variety produced by grafting, and for beauty of foliage and form it is unsurpassed. Such an abundance of bright golden color is seldom borne on a single tree, but this one fairly glows and sparkles. It is certainly the most charming variety of the whole Arbor Vitæ family. A strong and vigorous grower usually attaining a height of 15 to 18 feet, forming a handsome narrow pyramidal tree, the lower branches resting on the ground. Our Peabodys are elegant specimens, trimmed and trained to a neat pyramidal form. This variety can be planted anywhere with entire success and is absolutely hardy.

GOLDEN SIBERIAN ARBOR VITÆ. A fine hardy variety, growing to the same perfect globe form as the green Siberian. The beautiful, regular form of this tree is all that we could wish for in that respect and when to this is added a compact mass of dark golden color, we do not know of anything more desirable. Its rapid growth and perfect globe form, broad at the base tapering to a narrow pyramid, gives us a tree of decided attractiveness. Grows 8 to 10 feet tall, always retaining its soft golden hue. Our Golden Siberian Arbor Vitæ, are clipped specimens, trimmed to perfect form with dense foliage.

Price:	Transplants	Each	10
4	to 5 feet, sheared specimens B. & B.	\$6.00	\$55.00

THUYA STANDISHI (Japanese Arbor Vitæ). A remarkable variety forming a drooping conical tree about 16 feet in height with rather an open head, the habit of the branches being somewhat pendular, drooping gracefully. The form is even and regular, with foliage of a wonderful rich dark green color, which is brightened by a peculiar glossiness on the upper surface. A tree of great beauty. It is planted extensively upon lawns and in ornamental groups, being entirely hardy.

Price:	Transplants	Each	10
2	foot, B. & B.	\$2.50	\$22.50

TAXUS CUSPIDATA (Japanese Yew). A native of Japan, where it grows wild upon the mountain sides and scarcely ever exceeds several feet in height. A most attractive, hardy, and desirable variety, and of all rare Japanese species this certainly is the best. In form it is somewhat similar to our native Yew, growing mostly with the same spreading habit, and with numerous slender branchlets densely clothed with foliage of deep green, interspersed with bright red berries in Summer.

Taxus Canadensis.

Price:	Transplants	Each	10
2	to 3 feet, B. & B.	\$3.00	\$27.50

TAXUS WASHINGTONIA. A superb variety and one of the most beautiful of its family, for lawn and garden planting. It forms a neat upright little tree and has foliage of a bright golden hue.

Swiss Stone Pine.

Swiss Stone Pine.

A handsome hardy specie, that was introduced into cultivation about the year 1746, from the highest regions of the Alps, between 4,000 and 6,000 feet elevation. It forms a handsome regular tree, clothed with branches to the ground, very dense in its growth and hardy enough to withstand the most exposed situations. Fine for use as a single specimen, and admirable for mass or group plantings as its dark foliage is striking and forms a splendid contrast with other varieties. An excellent quality in the Swiss Stone Pine is its ease of adaptability to almost all kinds of soils and situations. A medium fast grower and at maturity reaches a height of 25 feet. A most commendable variety both for its beauty and utility.

Price:	Transplants	Each	10	100
8 to 12 inch	\$0.35	\$ 3.25	\$25.00

Abies Veitchi.

This handsome new variety was discovered by J. H. Veitch, high up in the mountains of Japan. It is a rare and magnificent tree of remarkably symmetrical habit naturally growing to a straight narrow pyramid, of delightful outline. It is almost impossible to describe fully this most beautiful of all Firs. People are simply amazed at its grandeur. The foliage is a mass of sparkling silver and deep dark green. The pretty little needles which entirely cover each branch are about one-inch long, the upper side being green and the underside silvery blue. Such a remarkable combination of color is rarely seen on out of door trees, but this one is absolutely hardy, and not affected in any way by extremes of heat or cold. A moderately fast grower and soon develops into large beautiful specimens. Our stock is extra choice, being all grafted, and of perfect form and color.

Price:	Transplants	Each	10
1½ to 2 feet, B. & B.	\$2.50	\$22.50

Golden Retinospora.

Sometimes called Japanese Cypress. Clothed in a mass of gorgeous golden foliage, so dainty and attractive that it adds beauty and splendor to its entire surroundings. If planted on rich soil in a somewhat protected location they develop to their highest type of beauty, both in form and color.

Price:	Transplants	Each	10
3 foot, B. & B.	\$2.50	\$22.50

Green Retinospora.

The foliage is delicate, feathery and fernlike. Grows naturally to globe shape. Its appearance is improved by annual shearing. These attractive little Evergreens show to the best advantage when planted in front of shrubbery or beside other Evergreens.

Price:	Transplants	Each	10
3 foot, B. & B.	\$2.50	\$22.50

Shade and Ornamentals

Norway Maple

American Linden.

Weeping Mulberry.

This department includes trees of varieties which drop their leaves in Winter. Their uses are manifold, the more important being the beautification of landscape, shade and shelter. No garden or landscape is complete without them. Plant a few of these on your lawn, dooryard or tree bank and you will be surprised how they will increase the value and beautify your property. The trees offered below are all select straight specimens and fully uphold the reputation of all "Dundee Grown" stock.

Maples.

One of the most widely known class of trees and the most valuable. We offer three varieties of Maples—the best. For grace of form, beauty of foliage and grateful shade no tree can excel the Maple, and the purple-leaved varieties are simply superb. In all cases where diameter is given the tree is measured at the base. Value for money received is our watchword.

NORWAY MAPLE. Handsome round headed trees, and excellent for lawn, tree banks, etc., where a spreading tree is wanted. Medium fast grower with broad green leaves which turn pale yellow in Autumn. (See illustration.)

Price:	Transplants	Each	10	100
4 to 5 feet	\$.20	\$ 1.50	\$ 12.50

Willows.

Besides the beauty of their airy Summer foliage, the Willows have a distinct value in the brightness of their bark when the leaves have fallen. They grow fast and do well on all soils.

GOLDEN BARK WILLOW. The bright golden bark of this variety makes it strikingly attractive, especially in the Winter. It makes a very pretty tree with its graceful drooping branches.

Price:	Transplants	Each	10	100
6 to 8 feet	\$.50	\$ 4.50	
8 to 10 feet75	6.50	

Tea's Weeping Mulberry.

The most beautiful weeping tree of recent introduction. The slender branches grow downward parallel with the stem, forming an umbrella like shape and a dense canopy which can be used as a playhouse for the children. Grafted on a straight stem 6 to 8 feet high its branches sweep the ground, forming a beautiful tent of green. The foliage of this attractive tree is both graceful and beautiful. The most popular arrangement for planting is to place one on each side of the walk leading to the house. One or more of these trees should be on every lawn. (See illustration.)

Price:	Transplants	Each	10	100

4 year heads 6 to 7 foot stems	1.50	12.00	

American Linden.

We make a specialty of this marvelous tree, as it is one of the hand-somest native trees we have. Its large leaves and beautiful blossoms, together with its dense spreading habit of growth, make it valuable as a lawn tree as well as for street and avenue planting. The Linden grows fast, forming shapely trees and casting a dense cool shade. (See illustration.)

I received the Evergreens in good shape and all are growing fine.—Samuel Mitchel, Thinandrop, W. Va.

Hill's "Ideal Collection," Price \$2.00.

In our vast collection of hardy Evergreens, Ornamentals, Shrubs, etc., we do not think there are any which have achieved greater popularity, or whose splendid qualities are so widely appreciated as the six varieties offered here. Such splendid value as this collection offers is really rare to find. These trees will quickly develop into large noble specimens, and provide all the shade and protection your place will need. This stock is all Hill's Best Quality.

- 3 White Birch, 3 to 4 feet. 2 Magnolia Acuminata 1½ to 2 feet.
3 Norway Maple, 4 to 5 feet. 3 Catalpa Speciosa 2 to 3 feet.
2 American Elm, 3 to 4 feet. 2 Pin Oak, 3 feet.

Birch.

WHITE BIRCH. See reproduction in colors on outside cover page. This tree is a rapid grower with beautiful spray-like branches. The white paper like bark is especially attractive when planted among Evergreens, the bark being smooth and of a creamy or ivory whiteness. It grows to be a large tree 60 feet high.

Price:	Each	10	100
3 to 4 feet	\$0.20	\$1.80	\$15.00
4 to 5 feet	.25	2.20	20.00
5 to 6 feet	.30	2.80	25.00

CUT-LEAVED WEEPING BIRCH. This is the favorite of all trees for lawn and cemetery planting. Its graceful drooping branches and delicate leaves together with its silvery white bark so characteristic of the Birches, all combine to make it the most popular tree grown. It should be on every lawn.

Price: 6 to 8 feet \$1.25 each; per 10 \$11.00.

BLACK WALNUT. This majestic tree grows to great size. Has rough dark bark and beautiful foliage. The nuts of this tree are in great demand and bring high prices.

Price:	Each	10	100
4 to 6 feet	\$0.25	\$2.00	\$15.00
6 to 8 feet	.30	2.50	20.00

MAGNOLIA ACUMINATA. A wonderful tree, grows 75 feet tall. In mid-summer large creamy white blossoms appear among its deep green leaves. A grand avenue tree. Foliage bright yellow in Autumn. Price: 1½ to 2 feet, 25 cents each; per 10, \$2.00; 10 to 12 feet (extra), \$6.00 Each.

MAGNOLIA SOULANGEANA. A rare hybrid, grows to twenty feet tall and famous for its large flowers, rosy purple without and soft pink within. A magnificent variety.

Price:	Each	10
3½ feet, B. & B.	\$2.25	\$20.00

Elm.

AMERICAN WHITE ELM. The grandest and most picturesque of all American trees, and doubtless so well known that a lengthy description is needless. This tree is adapted for every purpose, being used for street, park, boulevard and lawn planting, developing into trees of immense size of graceful drooping form. See illustration.

Ash.

EUROPEAN MOUNTAIN ASH. A very pretty tree with abundant clusters of large orange berries in Autumn. It is already well known and highly esteemed as one of the most beautiful trees that grow. A vigorous grower and will add much to the beauty of your home.

Price: 8 to 10 feet, each \$0.75; per 10 \$6.00.

AMERICAN WHITE ASH. Rapid grower attaining height of 120 feet. Will furnish quick shade, which makes it popular for lawn or tree-bank planting. Have straight clean trunks, smooth gray bark and glossy leaves.

Price: 6 to 8 feet, each \$0.40; per 10 \$3.50.

OAK-LEAVED MOUNTAIN ASH. A tree of pyramidal habit of growth and has deeply lobed oak-like leaves, green above and woolly underneath. Very popular.

Price:	Each	10
4 to 5 feet	\$0.50	\$4.50
5 to 6 feet	.75	7.00

Dear Sir: I received the trees all right and they are very fine. I am well pleased.—Anton Boldt, Bushton, Kansas.

Weeping Birch.

American White Elm.

1. Mass and background planting. A cool place in summer and warm in winter.
2. Red Oak used for street planting. 3. American Linden in Nursery.
4. Carolina Poplar used for street planting.

Oaks.

The Oaks are known from the Atlantic to the Pacific, and as a practical tree for all purposes they are unsurpassed. For wide lawns, Parks, public grounds, avenues, etc., few trees are so majestic and imposing. Our soil and climate here is especially adapted to the culture of Oaks—in fact the native timber in the beautiful Fox River Valley in which our Nurseries are situated—consisted at an early date entirely of Oak. We plant annually many hundred bushels of Acorns to supply the immense demand. For prices on seedlings see page 35.

AMERICAN RED OAK. The King of Oaks for commercial as well as ornamental purposes. It is a distinct native American variety. A rapid grower with large foliage which turns a purplish scarlet hue in the Autumn. For ornamental purposes it is unsurpassed. From the illustration note what a beautiful street tree it makes, and so strong, sturdy and upright looking, growing to unusual proportions from 90 to 100 feet tall, living to be centuries old. A most beautiful object on the lawn.

Price: 6 to 8 feet, each, \$0.75; per 10, \$6.50

PIN OAK. An ideal street tree. It is distinguished by its elegant growth, and the drooping tendency of its limbs, and fine deeply-cut foliage, which, in Autumn colors brilliantly. It grows faster and develops the family characteristics earlier than most Oaks, as may be seen from some fine avenues planted within the last score of years. It grows 60 to 80 feet, sometimes taller.

Price: 3 feet, each, \$0.20; per 10, \$1.50; 6 to 8 feet, each, \$1.00; per 10, \$9.00.

Oak Seedlings in Nursery.

Dear Sir: The trees are here they are a fine lot. I am more than pleased. I want to thank you for the extras.—W. H. Gumm, Laup City, Nebr. (5-4-09)

Dear Sir: The trees arrived here in good condition. Will want more next season. The trees I got from you last year are doing fine in this dry country.—Geo. Stradal, Colyer, Kansas. (5-10-09)

Dear Sir: Trees arrived in good shape and are very satisfactory.—Geo. W. McAdam, Vanderbilt Bldg., Tarrytown, N. Y. (4-29-09)

Dear Sir: I received the trees yesterday and have this to say. I have handled trees by the thousands and never found trees put up in such fine shape before. Thanks for premium.—E. Sanders, Morrill, Kansas. (5-1-09)

Dear Sir: Trees received in first class condition. Your bill will be presented to board for approval at next meeting.—Wm. Allen, Supt. The Homewood Cemetery, Pittsburg, Pa.

SPECIAL OFFER No. 110. PRICE \$1.25

1 Red Oak 6 to 8 feet; 2 pin Oak 3 feet; 2 Norway Maple 4 to 5 feet.

Note: Trees on tree-bank should not be planted closer than 25 foot apart.

Chestnuts.

HORSE CHESTNUT. In May it is covered with magnificent erect spikes or pyramids of white flowers. As a single lawn tree it has no equal. The foliage is large and dense, and it bears large brown nuts. Our trees are stocky and strong and will soon develop into beautiful large specimens. They are much planted along roads and in parks and private grounds. Grows to 60 and 80 feet tall, and has no superior as a specimen flowering tree. They are hardy, vigorous, free from insects and are among the first trees to unfold their leaves in Spring. (See illustration.)

Price:	Transplants	Each	10	100
2 to 3 feet	\$0.15	\$1.25	\$ 7.00
3 to 4 feet20	1.75	15.00

Catalpas.

We offer two varieties of the Catalpa family—the Hardy Catalpa Speciosa, and the Catalpa Bungeii. The Catalpa Speciosa is mostly valuable because of its popularity along commercial lines, altho when planted on lawns it makes a very ornamental tree. The Catalpa Bungeii is primarily an ornamental tree and is very striking.

CATALPA SPECIOSA. This valuable tree is a rapid grower. The foliage is of a light green color, with flowers two inches broad. It blossoms in June. Its seed pods are from ten to eighteen inches long. It is getting more popular each season because it has such pretty leaves and flowers.

Price:	Transplants	Each	10	100
2 to 3 feet	\$0.05	\$0.45	\$ 4.00
3 to 4 feet10	.75	6.00
4 to 6 feet20	1.85	15.00
6 to 8 feet35	3.00	25.00

CATALPA BUNGEII. The illustration gives a better idea of what this wonderful tree is than any description we could give. Of Chinese origin. The tops are grafted on straight stems, forming a pretty dome-shaped head of great soft heavy leaves. To get best effect plant along both sides of a driveway. The demand for these trees has been growing by leaps and bounds and they are now planted all over the country except in some extremely cold parts. It does not become scraggy but keeps its round headed, straight bodied appearance always. Single specimens planted on lawns attract great attention. If you really want something out of the ordinary, and different from anything your neighbor has, you ought to have Catalpa Bungeii.

Price:	Transplants	Each	10
6 foot stems	\$1.25	\$11.00

Poplars.

Poplars are more easily and quickly grown than almost any other tree, and thrive in nearly all soils. Their leaves are bright and their tops thin, fitting them for numberless purposes.

CAROLINA POPLAR. An extremely rapid grower, and desirable where quick shade is wanted. It seemingly thrives just as well on poor soil as it does on rich, and grows into a fine shaped spreading tree. Showy and cheery from the constant movement of its glossy, silver-lined leaves, yet always casting a dense cool shade. Much used for sub-division planting, being of quick growth commendable and economical. The demand for this tree is enormous and it well merits its popularity.

Price:	Transplants	Each	10	100
6 to 8 feet	\$0.35	\$3.00	\$25.00
8 to 10 feet50	4.00	35.00

LOMBARDY POPLAR. Of obelisk or pyramidal form growing rapidly to 150 feet tall. Much used in Italian formal gardens. Always makes a striking feature in any landscape.

Price:	Each	10
6 to 8 feet	\$0.50 \$4.50

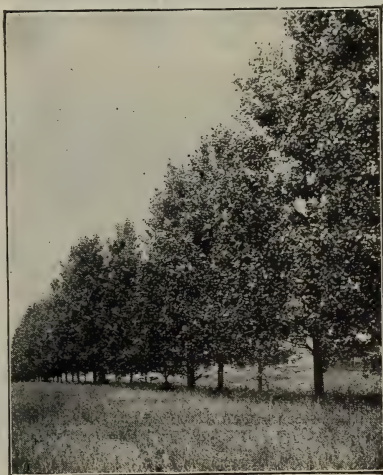

Horse Chestnut.

Catalpa Bungeii.

Dear Sir: Out of the 1500 trees I bought of you last Spring I lost only a few, and will want a larger order next year. Please send me your catalog at an early date.—J. L. Goedert, Cozard, Nebr. (8-6-09)

Carolina Poplars Along Drive.

Purple Beech.

Special Offer No. 111.

Price \$1.95.

- 1 Purple Leaf Beech 4 to 5 feet
- 1 Bechtel's Flowering Crab 3 to 4 feet

4 to 5 feet1.65	15.00

PURPLE-LEAVED PLUM. This wonderful little tree, of Persian origin, is covered with a mass of deep crimson purple colored foliage. The branches and twigs are a rich glossy black, which together with its splendid shapely habit of growth makes it one of the most delightful trees for lawn planting we have. Grows 25 feet tall.

Price:	Transplants	Each	10
4 to 6 feet	\$0.50	\$4.50

CAMPERDOWN WEEPING ELM. A marvelously beautiful specie. A decided weeper. Price: 4 yr. heads 6 foot stems \$5.00 each; per 10, \$40.00.

General Directions for Planting.

Dig holes in the first place, large enough to admit the roots of the tree to spread out in their natural position; then, as before directed, let one person hold it in an upright position, and the other shovel in the earth, carefully putting in the finest and the best from the surface among the roots, filling every interstice, and bringing every root in contact with the soil. When the earth is nearly filled in, a pail of water may be thrown on to settle and wash in the earth around the roots; then fill in the remainder and tread gently with the foot. The use of water is seldom necessary, except in dry weather, early in the Fall or late in the Spring. Guard against planting too deep; the tree, after the ground settles, should stand in this respect as it did in the Nursery. In very dry gravelly ground the holes should be dug twice the usual size and depth and filled in with good loamy soil.

Dear Sir: It gives me great pleasure to thank you in behalf of the University for the fine trees you sent.—Robt. W. Holt, Lehigh University, So. Bethlehem, Pa.

Ornamental Flowering Shrubs.

Nothing adds more to the beauty of a place than to have the sides and background well filled with groups of shrubbery. Whether you have a lawn of many acres or an humble dooryard, we commend this class of plants as indispensable to the real beauty of your home. If you select with care you can have a succession of bloom from April till Snow, to say nothing of the beautiful color, form and shadow effects of flowers, foliage and bright berries. It is our aim to produce everything in Flowering Shrubby that is useful, hardy and worthy of cultivation in all climates. To no department do we give more attention, than to our Shrubby Department. And furthermore in no class of plants is there so much room for wide variations in quality. Our shrubs are grown with plenty of room to develop not only an abundance of long fibrous roots, but a large strong healthy top. In planting shrubbery, prepare the ground and maintain it as if for a crop of potatoes. Plant about four feet apart and mulch with straw or leaves. The time of bloom and height at maturity will be found under each variety.

Snowball.

ARROW WOOD (*Viburnum Dentatum*).

6 to 8 feet. May, June. A bushy shrub with upright branches especially admired for the abundance of its scarlet fruit that cling to the branches a long time. It has beautiful creamy white flowers.

Price: Each 3 for
1 to 1½ feet\$0.20 \$0.50

PERPETUAL BLOOMING RED SPIREA (*Anthony Waterer*).

A fine hardy perpetual blooming shrub particularly desirable for dooryard and lawn, makes nice shapely bushes 2 to 3 feet high; begins to bear its large flat clusters of rich rosy red flowers almost as soon as planted, and continues to bloom at short intervals all thru the Summer and Fall.

Price: Each 3 for
1½ to 2 feet\$0.30 \$0.75

JAPANESE SNOW GARLAND SPIREA (*Spiraea Thumbergii*).

3 to 4 feet. June. A beautiful shrub with numerous slender branches, forming a dense feathery bush, 3 to 4 feet tall. Native of China and Japan. Extremely brilliant foliage, bright green, fading in Autumn with brilliant tones of Orange and Scarlet. The beautiful pure white flowers, which appear in great profusion in early Spring, cover the plant with a mantel of snow.

Price: Each 3 for
1½ to 2 feet\$0.25 \$0.65

BEAUTIFUL WHITE DOUBLE FLOWERING SNOWBALL (*Viburnum Opulus Sterilis*).

One of the most charming hardy flowering shrubs in existence. Bears great clusters of pure white globulous flowers, like real balls of snow. Covered with bloom for weeks in the Spring. Grows five to seven feet tall—entirely hardy, needs no protection, splendid for dooryard, lawn and cemetery planting. Has rich dark green foliage crinkled and not subject to insects or diseases; does well anywhere and is always sure to bloom. Blooms in May.

HILL'S CHOICE LAWN COLLECTION, SPECIAL OFFER No. 112.

One each of all varieties offered on this page, seven big strong selected shrubs, first size, Price \$1.50.

The Deliciously Fragrant Lilac.

than make up for it in their wonderful bloom.

SYRINGA-CHAS X. A wonderful plant. Color, dark lilac red. One of the most beautiful.

SYRINGA-MME. C. PERIER. A beautiful double white variety, very large. Free bloomer.

SYRINGA-MARIE LEGRAY. Its blossoms are creamy white, large and of best possible form.

SYRINGA-LUDWIG SPATH. Large, single, dark purplish red. The finest of its color. Popular.

SYRINGA-PRES. GREVEY. Beautiful pale blue. Strong grower. Free bloomer. Very striking.

Price: For all above Grafted Lilacs, extra strong.

2 to 3 feet Each \$0.65 3 for \$1.85

HOLLY-LEAVED MAHONIA (Mahonia Aquifolium).

A valuable Evergreen shrub which retains its green appearance all Winter. It grows to medium size with purplish shining prickly leaves and showy bright yellow flowers in May succeeded by bluish berries. **Price:** 1½ to 2 feet, each 25c; 3 for 60c; 10 for \$1.50.

JAPANESE MAHONIA (Mahonia Japonica).

A new Evergreen shrub recently introduced from Japan. It has large distinct leaves and in the month of May it is covered with delicate yellow flowers which give it a striking appearance.

Price: 1 to 1½ feet, each 25c; 3 for 60c; 10 for \$1.50.

Weigelias.

The Weigelias occupy an eminent place in the shrub family. They produce in June large superb trumpet-shaped flowers of all shades and colors from pure white to red. They make a broad vigorous growth. Five to eight feet in height. They flower after the Lilacs in June. See illustration on cover.

THE BEAUTIFUL ROSE COLORED WEIGELIA (Weigelia Rosea). An elegant shrub with fine rose colored flowers. It was introduced from China some years ago and sprang into instant favor. Include this in your order.

WEIGELIA EVA RATHKE. A splendid new variety and perhaps the handsomest yet produced. Purplish red flowers, with creamy white markings.

Price on Weigelias 1½ to 2 feet each \$0.25; 3 for \$0.65; 10 for \$1.85.

WHITE FRINGE (Chionanthus Virginica). 8 to 10 feet. An extremely odd and beautiful shrub. In June the graceful lace-like white flowers hang in drooping panicles between the rich dark leaves.

Price: 1 to 1½ feet each \$0.30; 3 for \$0.80; 10 for \$2.50.

PURPLE FRINGE (Rhus Cotinus). 8 to 9 feet. An oldtime shrub or small tree of irregular habit. In Summer it is enveloped with a mass of fleecy purple bloom resembling smoke or mist.

Price: 1½ to 2 feet, each \$0.30; 3 for \$0.75; 10 for \$2.25.

HIBISCUS-ALTHEA (Rose of Sharon). A very symmetrical, rapid growing flowering shrub. Very desirable because they bloom in August and September.

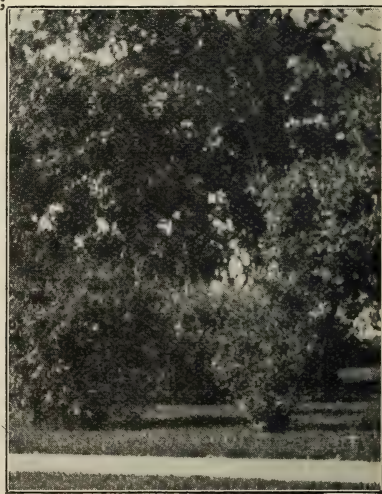

Price: 2 to 3 feet, each \$0.30; 3 for \$0.80; 10 for \$2.50.

Philadelphus (Syringa or Mock Orange).

We offer two varieties of the Mock Orange family knowing that each one is valuable and worthy of extensive planting, in fact, the Mock Orange has become indispensable in all lawn plantings.

GARLAND MOCK ORANGE (Philadelphus Grandifolia). A superb shrub, growing 8 to 10 feet tall. It blooms early and in very graceful sprays. Has pure white highly scented flowers, beautiful for cutting. Valuable for backgrounds, screens, groupings and specimens. In spite of the great number of new plants which have been introduced, the old Philadelphus holds its own and is more popular than ever.

Price:

	Each	3 for	10 for
1½ to 2 feet\$0.30	\$0.80	\$2.50

GOLDEN MOCK ORANGE (Philadelphus Aurea). A striking shrub of medium size, with rich golden yellow leaves, that remain bright throughout the season. When planted in front of shrubs with green foliage the contrast is delightful. It forms a neat shapely bush and is without equal for attractiveness and brilliancy of foliage. See cover reproduction in color.

Price:

	Each	3 for	10 for
1½ to 2 feet\$0.30	\$0.80	\$1.75

Hydrangea P. G.

This is undoubtedly the grandest and most beautiful of all the hardy flowering shrubs for the door-yard and lawn. The illustration herewith gives some idea of its magnificent beauty. We guarantee our Hydrangeas to give abundance of bloom the first season. The flowers are rich creamy white, changing to pink and borne in immense clusters. It blooms in August, the first and every succeeding year, and continues to bloom for months. It is entirely hardy, i.e. trouble to grow, and does well anywhere.

Price:

	Each	3 for	10 for
1½ to 2 feet\$0.25	\$0.60	\$1.75
2 to 3 feet35	.90	2.25
3 to 4 feet45	1.20	3.00

Note: An annual shortening of branches tends to increase the size of the flowers.

CUT-LEAF SUMACH (Rhus Glabra Lanciniata).

A very striking plant growing to height of 8 to 10 feet with deeply cut leaflets, producing a fern-like effect, which turns to rich red crimson in Autumn. Fine for massing and very scarce and rare.

Price:

- 2 Killarney Roses
- 2 Trumpet Vines

A New American "Everblooming Hydrangea."

This new American Hydrangea is believed to be the most beautiful hardy flowering shrub introduced during the last twenty years. It was found growing wild in the rocky hills of Western Pennsylvania several years ago, and finally was introduced into central Ohio. From this introduction numerous plants have been grown and planted, so that many plants are now growing, three to five years old, and blooming profusely from early June till toward Autumn frosts. The illustration is from a photograph of a three-year old plant, taken June 18, 1908. The plant which attains a height of five or six feet, with nearly the same breadth, is of far more graceful habit than the old form; with large trusses of beautifully formed flowers of dazzling whiteness, rendering this a plant of peerless beauty. The profusion of bloom of this new Hydrangea is very unusual. There have been counted 100 good trusses on one plant—trusses $7\frac{1}{2}$ inches in diameter and under. The flowers are unbleed instead of spiked and bloom from June till September, or frost, thus coming nearly six weeks earlier than Hydrangea P. G. and lasting until after that has passed. The demand will be enormous and for that reason we do not wish to sell over ten plants to each person.

New Everblooming Hydrangea (*Hydrangea Arborescens Sterilis*.)

THE BEAUTIFUL "SNOWBERRY" (*Symphoricarpus Alba*). This beautiful shrub is literally covered with pure white berries in the late Summer and Fall. Grows 4 to 6 feet high, blooming in July and August. See illustration. Also color reproduction on cover.

Peonies Rival the Rose.

PINK GRANDIFLORA. Immense heavy blossoms of deep rose pink and very fragrant. One of the showiest and most beautiful pink varieties in existence. Also very pretty in bud. Blossoms profusely in mid-summer. **Price:** Large strong roots, Each \$0.45; 3 for \$1.30; 10 for \$4.00

HILL'S CHOICE HERBACEOUS PEONIES.

The Peony is today without a rival as a hardy garden favorite and is quite naturally so, as no other hardy garden plant probably thrives as well with as little special care and produces so fine a display of gorgeous bloom. The great diversity of color ranging from pure white to dark red very much increases their value. Our strong hardy plants if planted in mellow rich soil will give a fine display of blossoms the first season. The Peony is unquestionably the finest herbaceous perennial in the world. It rivals the Rose and when you look at a good double one it is hard to see much difference. The three varieties which we offer give a wide range of color and are absolutely the hardiest and most popular varieties in cultivation today. Plant 3 feet apart.

FESTIVA MAXIMA. This is acknowledged to be the best white Peony in existence both in color and form. Of the purest white splashed with a few streaks of crimson in center.

Price: Each 3 for 10 for
Large strong roots\$0.50 \$1.40 \$4.50

RUBRA SUPERBA. Large, late, vigorous, sometimes called Red Festiva Maxima. Its bright red double blossoms are gorgeous and make a delightful contrast to the pure white of the Festiva Maxima.

Price: Each 3 for 10 for
Large strong roots, ...\$0.45 \$1.30 \$4.00

BEAUTIFUL HARDY CLIMBING VINES.

Flower lovers and gardeners know how indispensable are vines and climbers for beautifying one's place, especially near the house. Plant Clematis, climbing roses and honeysuckles about the front porches, with perhaps a vine or two of the Chinese Wisteria to climb as high as the roof. Stone or brick walls are always prettier when ivy clad.

CLEMATIS PANICULATA. Try this the most popular climbing vine we have. It is of very rapid growth, covering quickly trellises and arbors with handsome clean glossy foliage, which is that healthy green color that so few of this class of plants possess. The flowers are pure white, borne in immense sheets, almost completely hiding the foliage, and of a most delicate fragrance. It flowers in September when few other vines are in bloom. **Price:** 2 year No. 1 extra selected, Each \$0.35; 3 for \$1.00

CLEMATIS JACKMANNI. This variety, with its strong healthy growth, hardy nature and rich deep velvety-purple flowers, is extremely popular.

Price: 2 year No. 1 strong plants, Each \$0.40; 3 for \$1.10; 10 for \$3.75

THE JAPAN OR BOSTON IVY (Ampelopsis). The grandest of hardy climbing vines in existence, for covering houses, churches, schools, etc. Its glossy ivy leaves overlap each other, and its long delicate young shoots stretch up the walls with free rapid growth.

Price: 2 year No. 1 selected plants, Each \$0.30; 3 for \$0.85; 10 for \$2.75

PURPLE CHINESE WISTERIA. A rapid growing tall vine with handsome foliage and flowers. The purplish pea-shaped flowers are profusely borne in immense drooping clusters 7 to 12 inches long. **Price:** Each 3 for 10 for
2 year No. 1\$0.35 \$1.00 \$3.00

HALL'S JAPAN HONEYSUCKLE. One of the best climbing vines on the list. It is nearly evergreen, its foliage retaining its green color nearly all Winter. Its main feature is its beautiful yellowish white flowers, which are so deliciously fragrant as to be noticed for miles. **Price:** Each 3 for 10 for
3 yr. extra selected\$0.30 \$0.80 \$2.75

OTHER CLIMBING VINES.

Am. Trumpet Vine. 3 yr. extra selected. 4 feet 25c each, 3 for 65c.

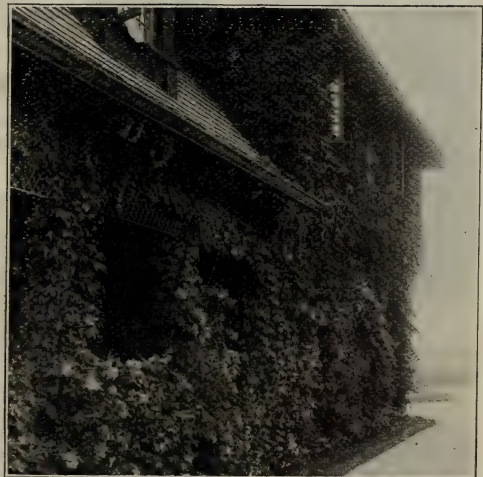

Dutchman's Pipe. 2 yr. 65c each, 3 for \$1.80.

Kudzu Vine. Strong roots, 35c each, 3 for \$1.00

Special Offer No. 116.

One each of the above climbing vines, extra selected plants, eight in all.

Price:\$2.65

American
Beauty

Hill's "Quality" Roses.

In order to supply the increasing demand for Roses, we have enlarged our facilities and are now propagating on a more extensive scale than ever. Roses are the most important flowering shrub we have—the mere name is an inspiration to garden lovers. No home or garden is complete without them, no arrangement satisfactory that neglects them; in fact they are indispensable. Our immense stock and great variety of Hardy Roses enable us to furnish assortments adapted to various purposes, and intending purchasers are invited to examine our lists and whenever we can be of any assistance in making selections our services will be cheerfully given. Our plants are all large, strong **field grown** bushes, (not small insignificant mailing size stock) and they are absolutely guaranteed to make a sturdy growth, and produce a profusion of bloom the first season. It is the **quality** of our Roses alone which makes this guarantee possible. The fact that we ship our plants to nearly all the large estates throughout the country is proof positive of the quality of our stock.

Dear Sir: The shipment of Rose bushes arrived yesterday and I wish to take this opportunity of expressing to you my appreciation, not only of the high grade of the stock furnished, but also the excellence with which the package was prepared and the business-like way in which you handled the entire order. I have purchased a great many plants from different concerns in the past, but these were positively the finest I have ever received.—Hugh Munro, St. Paul, Minn.

Garden Hybrid Roses—Strictly Hardy.

This class of Roses bloom profusely in June and at intervals throughout the Summer and Fall. The popular hardy garden roses mostly belong to this class and are always satisfactory. Do not allow roses to suffer for want of plenty of fertilizer, as they are gross feeders, and only when they have plenty to feed on can they be expected to produce the best results.

Price: of Roses except where noted, 35 cents each; \$3.00 per 10; \$27.50 per 100.

ANNE DE DIESBACH. Raised from La Reine. Color, bright carmine. A beautiful shade, very large.

ALFRED COLOMB. A brilliant carmine crimson, very large, full and of fine globular form.

AMERICAN BEAUTY. Well known as one of the grandest and most beautiful roses in cultivation. Immense buds and flowers of rich glowing crimson color.

Price:Each \$0.40; Per 10 \$3.75

BARONESS ROTHSCHILD. An exquisite shade of rich satiny pink. Very symmetrical, distinct and beautiful.

CLIO. Flowers large, of fine globular form, flesh color.

GENERAL WASHINGTON. Color bright crimson, fading in the sun; very large and full.

MARGARET DICKSON. Very large, beautiful, white.

FISHER HOLMES. A very beautiful and valuable rose, deep crimson.

FRAU KARL DRUSCHKI. This magnificent variety has taken first prize at all the great flower shows of Europe, and it is undoubtedly one of the grandest hardy pure white roses ever introduced.

Price: Fine plants,Each \$0.40; Per 10 \$3.50

GENERAL JACQUEMINOT. Famous the world over as one of the most magnificent hardy crimson roses ever introduced. Large, very fragrant, soft red.

Special Offer No. 117. Ten roses, one each of above \$3.45

The Cream of This Splendid Class.

- 1 **GENERAL JACQUEMINOT.** Crimson. Very fragrant. Extra large, and blooms freely.
- 1 **FRAU KARL DRUSCHKI.** White, large and fragrant. The very best White Rose.
- 1 **AMERICAN BEAUTY.** Red. Most popular rose grown. Without equal for beauty and fragrance.
- 1 **PAUL NEYRON.** Bright shining Pink. Clear and beautiful, finely scented. Best Rose grown.
- 1 **KILLARNEY.** A most charming Rose. Color Pink. Buds long and pointed.

Special Offer No. 119. Above five superior Roses. Strong field-grown, of Hill's highest quality. Guaranteed to bloom the first year. **BY EXPRESS. \$1.45.**

GARDEN HYBRIDS (Continued).

PAUL NEYRON. A magnificent rose. The largest and finest of all. The flowers are immense; color of bright shining pink; clear and beautiful; very double and full; finely scented. Blooms the first season and all Summer. No collection is complete without this wonderful variety.

MAGNA CHARTA. An old favorite. Large double flowers. Rosy red flushed crimson.

MRS. JOHN LAING. Soft pink, of beautiful form, exceedingly fragrant and a remarkable bloomer.

JULES MARGOTTIN. Cherry red. Splendid form.

JOHN HOPPER. An excellent rose; hardy and abundant bloomer; solid and regular flowers, perfectly double, clear bright rosy pink, very fragrant.

MADAME GABRIEL LUIZET. Coral-rose, suffused with lavender and pearl. Superb. (Bud-ded).

MAD. PLANTIER. Pure white, large double. Extremely hardy and strong growing.

MARCHIONESS OF LORNE. Free-flowering. Large sweet and full. Rich rosy color. Center carmine.

MARSHALL P. WILDER. Large, well-formed; color, cherry carmine.

PRINCE CAMILLE DE ROHAN. Rich crimson-maroon, almost black. Large and full.

ULRICH BRUNNER. Rich glowing crimson, flamed scarlet. Large, full; long stemmed. Hardy.

HYBRID TEA ROSES.

Very free bloomers; hardy with slight protection. These delightful, delicately formed fragrant roses are very popular as they bloom profusely all the growing season, and are ideal in form, color, fragrance and foliage.

BABY RAMBLER. The rose hybridists certainly made a remarkable happy combination when they succeeded in creating this wonderful new rose. Imagine a bushy rose just right for the flower garden or a pot plant as to size, with all the beauty and color and great clusters of the **Crimson Rambler**, and add to this that it will bloom constantly all Summer. Perfect in form and color.

CLOTHILDE SOUPERT.

Known the world over as one of the best of all roses. Blooms absolutely all Summer and until late in the Fall until stopped by frosts. Medium size; very double and beautifully imbricated, produced in clusters; pearly white.

Price: 1 year plants, each, 15c; 3 for 40c; 10 for \$1.25; 100 for \$12.00.

KAISERIN AUGUSTA VICTORIA.

An exquisite white variety faintly blended with cream color; very large, full and double, almost perfect in form.

ROSA CAEMMINUS. A magnificent bedding variety. Color of a bright gorgeous pink, blooms continuously until late in the Fall. One of the best. Planted extensively in European rose gardens.

LA FRANCE. Delicate silver rose, changing to silvery pink; very large, full, of fine globular form; a most constant bloomer.

MME. ABEL CHATELAIN. Superb; free-blooming; the best of its color; rosy carmine, shaded darker. A grand grower. Hardy.

Price of Hybrid Tea Roses.

(Except where noted)

Very strong field grown. Each 40 cents; per 10 \$3.50; per 100 \$30.00.

Special Offer No. 120.

1 each of above six varieties, 6 big strong bushes. **Price**\$1.95

Think of the joy of having a beautiful bouquet of roses on your table, fresh ones almost every day throughout the Summer. These are the kind of roses you want.

HILL'S "BEAUTY BED" COLLECTION.

10 Roses, selected from the above eleven varieties, our selection. Enough to fill a bed 6x10 feet. Plant three feet apart. Large sized bushes, to go by Express. **Price \$2.95.**

The Magnificent Irish Rose Killarney.

This queen of the Irish Roses excels any other of its class and color yet introduced, and by many it is recognized as the most beautiful, hardy, ever-blooming Tea Rose now under cultivation. Each season since it has been introduced, Killarney, has increased in popularity, and the demand has always exceeded the supply. Killarney originated in Ireland, near the shore of the historical lakes for which it is named and it does honor to the reputation of the home of its birth. The plant is strong and upright, with beautiful deep green foliage of a bronze tinge, and the rose is entirely free blooming, bearing immense long pointed buds and massive flowers on heavy shoots. The color is deep brilliant sparkling shell-pink, of the most exquisite shade. The flowers are of delightful fragrance, immense size, and have thick petals of great substance. It is without doubt the most wonderful rose ever produced, and every lover of roses should embrace this opportunity to secure extra fine plants at a reasonable price.

Price:	Each	3 for	10 for

Killarney.

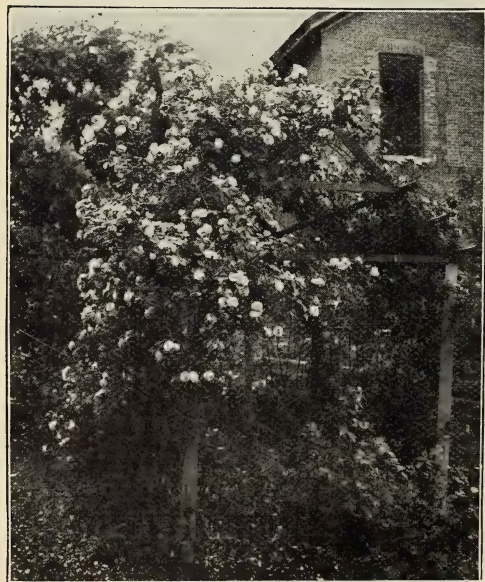

Hill's 5 Best Climbing Roses.

These climbing roses have become immensely popular because their remarkable merits entitle them to a place in every garden. The rose-loving public is gradually awakening to the fact that this class is almost indispensable for home planting. All bloom with great freedom, and there is scarcely a day during the growing season that they are not blooming. And such masses of flowers! They are simply exquisite and it is difficult to say which is the prettier. Certain it is that of all roses, Climbing Roses are among the cheapest, best and most satisfactory for general planting. Here are offered the best now in cultivation.

Price: on all Climbing Roses unless otherwise specified	Each	3 for	10 for
Strong 2 year No. 1 selected plants,	\$0.35	\$1.00	\$3.00

CRIMSON RAMBLER. The most popular Climbing Rose in cultivation, and deservedly so. In all parts of the country during June and July, this gorgeous crimson Climbing Rose can be seen in great glory, and the demand increases for it each year. It is most correctly termed "The flower of the masses." These plants attain a height of ten to twenty feet in a single season, producing in wonderful profusion large trusses of deep glowing crimson flowers. When in full bloom it presents a vivid mass of crimson beauty. It is absolutely hardy everywhere.

Price: Strong 2 year No. 1 selected plants, each \$0.50; 3 for \$1.35; 10 for \$4.00.

Baltimore Belle.

DOROTHY PERKINS. This is a grand new variety so hardy as to withstand the most severe Winters with impunity. Grows ten to fifteen feet in a season. Flowers are perfectly double with petals crinkled and are borne in clusters of ten to twenty that cover the bush for several weeks in the Spring. Blooms just in time for June weddings, and because of its abundance of bloom is a most valuable rose for cutting and decorating.

QUEEN OF THE PRAIRIE. Bright rosy red frequently striped with white. Very large, compact and beautiful. Will thrive in any part of the United States and should be in every collection.

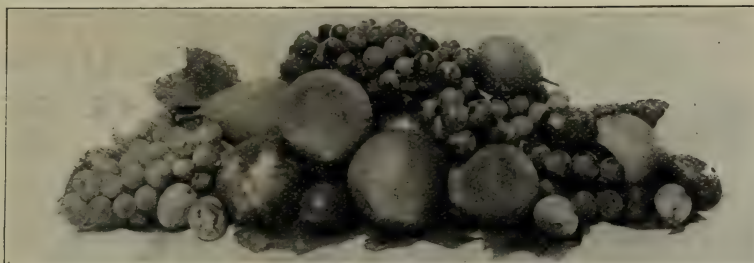

BALTIMORE BELLE. A rapid growing dark leaved prairie Rose. Blooms in large clusters of pale blush and white flowers late in the season. It is an exceedingly beautiful Rose and perfectly hardy.

EMPERESS OF CHINA. A hardy rapid growing Rose of graceful twining habit and few thorns. Bears fragrant flowers of soft rich red, shading to cherry pink. Very pretty.

FLOWER OF FAIRFIELD. A wonderful new variety, lately introduced from Europe. Very rare. A perpetual bloomer. Very vigorous. Color fiery red. **Price:** \$1.00 each.

Special Offer No. 121.

STRONG PLANT!					

FRUIT TREES

SMALL FRUITS, GRAPE VINES, STRAWBERRIES, ETC.

Do you know the secret of growing big crops of large luscious fruit? To be successful you must, above all things, start right. Get large strong, healthy standard sized stock. This applies to small fruits, just as much as it does to Apple, Cherry, Peach, Pear and Plum trees, etc. Our principal stock of fruit trees, small fruits, etc., embrace only those varieties which have been well proved, and can be recommended as the best now in cultivation. We cannot attempt to give complete directions on all points connected with tree planting, but simply a few hints on the more important operations. Everyone who purchases, should, if possible, put himself in possession of "Successful Fruit Culture" (see Page 30) in which will be found directions in regard to Fruit growing. Transplanting is to be considered under the following heads:

1st. The Preparation of the Soil. For fruit trees the soil should be dry, either natural or made so by thorough drainage, as they will not live or thrive on a soil constantly saturated with stagnant moisture. It should also be well prepared. On new, fresh lands, manuring will be unnecessary; but on lands exhausted by cropping, fertilizers must be applied, either by turning in heavy crops of clover, or well decomposed manure or compost. To insure a good growth of fruit trees, land should be in as good condition as for a crop of wheat, corn, or potatoes.

2nd. The Preparation of the Trees. In regard to this important operation, there are more fatal errors committed than in any other. As a general thing trees are planted in the ground precisely as they are sent from the Nursery. In moving a tree, no matter how carefully it may be done, a portion of the roots are broken and destroyed, and consequently the balance that existed in the structure of the tree is deranged. This must be destroyed by proper pruning, adapted to the size, form, and condition of the trees, as follows:

STANDARD ORCHARD TREES. These, as sent from the Nursery, vary from five to seven feet in height, with naked stems or trunks, and a number of branches at the top forming a head. These branches should all be cut back to within three or four buds of their base. This lessens the demand upon the roots, and enables the remaining buds to push with vigor. Cut off smoothly all bruised or broken roots up to the sound wood. In case of older trees of extra size, the pruning must be in proportion; as a general thing it will be safe to shorten all the previous year's shoots to three or four buds at their base, and where the branches are very numerous some may be cut out entirely.

3rd. Staking. If trees are tall and much exposed to the winds, a stake should be planted with the tree, to which it should be tied in such a manner as to avoid chafing. A piece of matting or cloth may be put between the tree and the stake.

4th. Mulching. When the tree is planted throw around it as far as the roots extend, and a foot beyond, five or six inches of deep rough manure or litter. This is particularly necessary in dry ground, and is highly advantageous everywhere both in Spring and Fall planting. It prevents the ground from baking or cracking, and maintains an equal temperature about the roots.

5th. After-culture. The grass should not be allowed to grow around young trees after being planted, as it stunts their growth. The ground should be kept loose and clean around them, until, at least, they are of bearing size.

APPLES.

The Apple is properly termed the "King" of all fruits. It is being planted much more extensively than at any time in its history. Our assortment is as complete as it is possible to make it. The following list includes all the varieties that are planted for commercial purposes and also those which are usually confined to the home fruit garden.

OF ALL APPLE TREES (also Crab).

	Each	per 10	per 100
Price: 5 to 7 feet	\$0.35	\$2.50	\$18.00

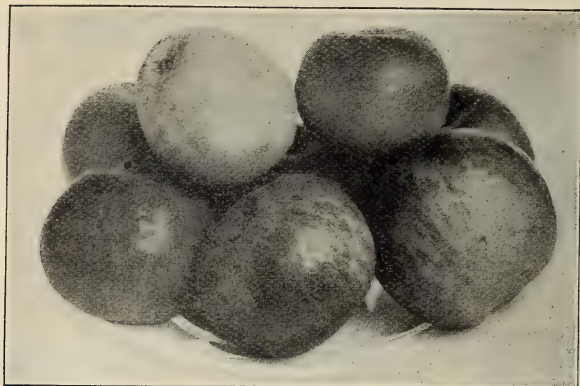

SUMMER APPLES.

RED ASTRACHAN. Large, roundish, nearly covered with deep crimson, over-spread with a thick bloom, very handsome, juicy, good though rather acid. The tree is very hardy, a free grower, with large foliage, and a good bearer; highly esteemed on account of its fine appearance, earliness and hardness. Valuable for all purposes, and fruit of best quality. August.

DUKESS OF OLDENBURG. A large beautiful Russian Apple; roundish, streaked red and yellow; tender, juicy and pleasant. A kitchen apple of best quality and esteemed by many for dessert. Medium early. Trees hardy, vigorous and abundant bearers. A most valuable sort for market as well as domestic use, always bringing top prices on the market.

YELLOW TRANSPARENT. A Russian variety. Tree hardy and a strong grower and an unusually early bearer. Fruit pale yellow, good size and quality; skin clear white at first, turning to pale yellow when fully ripe. Our experience with this variety is very satisfactory. We have found it the earliest of all Apples. Of a mild, pleasant yet sprightly flavor. It bears abundantly and at extremely early age. Two year trees in the Nursery row frequently produce fine fruit. Ripens about Aug. 1st. It should be in every home garden on the American Continent.

HILL'S TREES are best by over half a century's test.

FRUIT FOR THE HOME

should be the first thought of every farmer, of every Suburban home owner, in fact of everyone having a lot or garden large enough for a few trees. Nothing is more healthful or will afford so much pleasure and profit for a small outlay than fruit.

FALL APPLES.

For Price on Apples, See Page 29.

WEALTHY. A very valuable variety, and generally acknowledged to be the best on the list. Succeeds everywhere because exceptionally hardy. Fruit large, red, fine and juicy. From three to four years from planting, will bear from one-half to two bushels per tree. Tree very thrifty, a free grower, and the most productive of all. A good keeper, and famous for its beauty and delicious flavor. Has been planted extensively in commercial orchards for many years, but is also extremely valuable for home fruit garden. Ripens medium early.

FAMEUSE (Snow Apple). Medium size, deep crimson in color. Flesh snowy-white tender, melting and delicious. Tree vigorous with dark wood. A fine dessert fruit; valuable for market. Succeeds well anywhere, but particularly in the North. November to January.

MAIDENS BLUSH. Medium size; flat, pale yellow, highly colored on the side exposed to the sun; flesh tender, sprightly and sub-acid. A fine rapid growing tree, productive and a fine variety for the home orchard. September to October.

FALL PIPPIN. Very large, roundish, oblong, yellow, rich and delicious. Tree a free grower, spreading and fine bearer. An admirable baking apple.

WINTER APPLES.

BEN DAVIS. A large roundish, handsome yellow, overspread or splashed with red; flesh, white tender, juicy, and sub-acid. A very popular apple in the West and Southwest. December to March.

GOLDEN Russet. Medium size, of a beautiful, clear, golden, russet; very tender, juicy and rich, a thrifty upright grower and excellent bearer. A most hardy and valuable variety. November to April.

GRIMES GOLDEN. Medium to large size, round rich golden yellow, sprinkled with light gray dots; flesh crisp, tender, rich and juicy, sprightly. Tree hardy vigorous and productive. January to April.

JONATHAN. Of medium size, color red and yellow. Flesh tender, juicy and rich. A moderate grower. Very productive. One of the very best varieties either for table or market, and on account of its many sterling qualities and great beauty, it is undoubtedly the most popular apple today.

PEWAUKEE. Fruit medium to large. Skin bright yellow, striped and splashed with red. Juicy, sub-acid flesh; rich aromatic flavor. Esteemed especially for cold climate on account of its hardness.

TOLMAN'S SWEET. Medium size. Pale whitish yellow, slightly tinged with red. Flesh firm, rich and very sweet. Excellent for cooking. Tree a free grower, upright and very productive.

WINE SAP. Large. Roundish. Deep red and slightly yellow. Keeps well. Flesh yellow, firm, crisp, with a rich, high flavor. Moderately fast grower, and an excellent bearer. Succeeds well everywhere.

YORK IMPERIAL. Medium, whitish shaded with crimson in the sun. Firm, crisp, juicy, pleasant, mild, sub-acid. Tree moderately vigorous and productive.

NORTHWESTERN GREENING. Fruit large, round, conical. Color greenish yellow. Flesh white. Tree splendid grower and hardy as Wealthy.

RED JUNE. Good size and smooth. Deep red. Very attractive. Fine grained and tender flesh with mild sub-acid flavor. Good shipper and keeper. Tree healthy, vigorous and hardy.

CRAB APPLES.

Price Same As Other Apples.

The improvements in the varieties of Crab Apples have kept pace with other kinds of fruits. A few years ago it was thought fit only for cider, preserves and jelly, but there are varieties now that command a good price on the market for dessert purposes. Ornamental when in bloom and when loaded with highly colored fruits. They are entirely hardy, and do well in any kind of soil in the most exposed situations. They come into bearing very early, generally the second year and bear every year. They are unequalled for jelly, and can be dried, cooked, canned and preserved with the skin on, thus saving work.

WHITNEY No. 20. Large, averaging 1½ to 2 inch in diameter. Smooth, glossy, green splashed with carmine. Flesh firm, juicy and rich. A great bearer and hardy.

HYSLOP. Large size. Dark crimson with bloom very showy and most beautiful of all the class. Very hardy, and a most valuable variety.

SUCCESSFUL FRUIT CULTURE. A practical guide to the cultivation and propagation of fruits. By Samuel F. Maynard. Illustrated. 274 Pages, 5x7 inches, cloth.....\$1.00

PEARS.

The following list includes most of those which have been well tested and proven valuable.
GATHERING PEARS. One of the most important points in the management of Pears is to gather them at the proper time.

Summer Pears should be gathered at least ten days before they are ripe, and Autumn Pears, at least a fortnight. Winter varieties, if they will hang so long, may be left until the leaves begin to fall.
Thin the fruit. We cannot urge too strongly the following suggestion; when pear trees are heavily laden the fruit should be thinned when about one-third grown; else the fruit will be poor and the trees injured.

Price of Pears

	Standard size,	Each	per 10	per 100
5 to 7 feet	\$0.50	\$3.75	\$25.00

SUMMER PEARS.

BARTLETT. One of the best and most popular. Large; yellow and red; juicy, buttery, ripening in September.

CLAPP'S FAVORITE. A splendid Pear, resembling the Bartlett and ripening a few days earlier. The tree is hardy and vigorous.

AUTUMN PEARS.

FLEMISH BEAUTY. A large beautiful melting sweet Pear. The tree is very hardy, vigorous and fruitful.

KEIFFER. Very large; skin rich golden yellow; an early and great yielder. Ripens in November.

Bartlett Pears.

WINTER PEARS.

ANJOU. A large handsome Pear with good flavor. Keeps into mid-winter. Tree a vigorous grower and good bearer.

IDAHO. A native of Idaho. Yellow with red cheek, covered with spots. The shape is more that of an oblong apple than a pear.

DWARF PEARS.

We can furnish Bartlett, and Anjou, on dwarf stock. Dwarf Pears are grown on Quince stock and come into bearing sooner than the standards. Strict attention to them and high cultivation will result in a magnificent yield of fruit. **Price** on Dwarfs are the same as standards.

Early Richmond Cherry.

Keiffer Pears.

CHERRIES.

Cherries are of a rapid growth, producing large crops of luscious sweet fruit. We know of nothing in the fruit line that has given or promises to give in the future larger returns than the cherry orchard.

Price:	standard size	Each	10	100
4 to 6 feet	\$0.50	\$4.50	\$40.00

EARLY RICHMOND. Medium sized; dark red; juicy-rich acid flavor. A very large and sure bearer. One of the most valuable and popular cherries we have. A grand market cherry and every home orchard should include the Early Richmond. Does well everywhere.

MONTMORENCY. A cherry of the Richmond class, but larger and more solid. Ripens from ten to twelve days later than the Early Richmond.

ENGLISH MORELLO. Fruit large; dark red, nearly black; tender, juicy, sub-acid; valuable for preserves; tree small, slender growth; very productive.

Hill's "Home Orchard" Collection. Special Offer No. 122. Price \$5.00.

DO NOT CONFUSE the price of Hill's standard Fruit trees with the cheap prices quoted by some on seedlings or small mailing size trees. Hill's trees have a reputation of over half a century behind them. they are absolutely the best that can be grown.

Burbank's Plum.

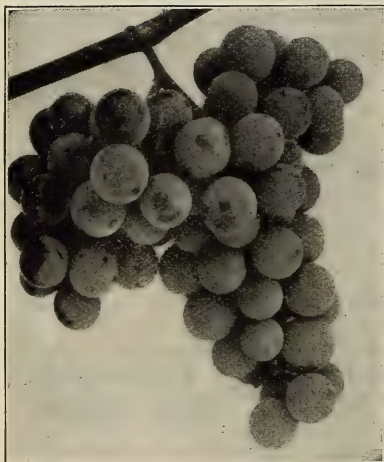

GREENSBORO. A large beautifully colored Peach, ripening in July. Flesh white, juicy and excellent.

ALEXANDER. Medium greenish white, nearly covered with rich red; melting juicy and sweet; stone small. Tree vigorous and productive. Ripens in July.

CHAMPION. Very large, some specimens over ten inches in circumference; creamy white, red cheek, sweet and juicy. Hardy and a good bearer. Ripens in August.

SPECIAL OFFER No. 123.

Four Plum, Four Peach, Two Crab Apple. Large standard trees, fine assortment, our selection. Ten trees in all,\$2.85

Concord Grapes.

PLUM.

The Plum delights in a cool, not too dry situation, and good, rich soil. The varieties we offer have been thoroughly tested, and are standbys. These may be relied upon to furnish yearly crops of this most delightful, highly profitable and exceedingly delicious fruit.

Price: of Plums: Each per 10 per 100
4 to 5 feet\$0.40 \$3.50 \$25.00

BURBANK'S JAPANESE PLUM. One of the most popular. Fruit conical and very large. Color, dark metallic red. Flesh, yellow, firm and juicy; flavor, rich and sugary.

ABUNDANCE. Fruit large and roundish; a rich cherry color with a whitish bloom. Flesh, light yellow.

WILD GOOSE. Fruit medium to large, rich golden yellow shaded with red.

LOMBARD. One of the most extensively grown. Color purplish. Flesh, yellow.

HAWKEYE. One of the largest, best and most profitable market plums grown in the Northwest. Fruit large; splendid shipper.

GREEN GAGE. One of the oldest known varieties. Fruit medium. Color, greenish yellow.

PEACHES.

To secure fine fruit give them an occasional dressing of wood ashes. Prune and mulch every Spring.

Price: of Peach Trees Each per 10 per 100
4 to 5 feet\$0.25 \$2.00 \$18.00

ELBERTA. Large; yellow with red cheek, of excellent quality. Freestone. Ripens July.

Elberta Peaches.

GRAPES.

No part of the fruit garden yields a richer harvest than the vineyard. Along almost any garden fence or walk there is room for vines enough to furnish luscious grapes from July to November.

Price: of Grapes: Each per 10 per 100
2 years, No. 1\$0.15 \$1.20 \$10.00

Black Grapes.

CONCORD. Early, decidedly the most popular grape in America, and deservedly so. Flesh, juicy, sweet, tender.

WORDEN. Bunch large, berries very large. Ripens 5 to 10 days earlier than the Concord.

MOORE'S EARLY. Berries extremely large and flavor is exquisite. Produces heavy crops. Ripens 15 days before the Concord.

CLINTON. Bunch small to medium, and compact. Is used principally for wine.

Hill's "Home Vineyard" Collection.

SPECIAL OFFER No. 124. Price \$1.35.

- 3 Concord 2 yr. No. 1 (Black)
- 1 Moore's Early 2 yr. No. 1 (Black)
- 3 Brighton 2 yr. No. 1 (Red)
- 3 Niagara 2 yr. No. 1 (White)

These are fine, large vines, and will astonish you with their thrift and sturdiness.

Orders for 5 of a kind at 10 rates; 40 at 100 rates.

RED GRAPES.

AGAWAM. Color red or maroon. Flesh tender and juicy. Vine a good grower and bearer.

BRIGHTON. Coppery red, bunches large. Flesh rich, sweet and of best quality. Ripens early.

DELAWARE. One of the finest of our native grapes. Bunches small and compact; berries small; light red.

WHITE GRAPES.

NIAGARA. Color pale yellow when fully ripe, sweet and of splendid quality. Ripens with the Concord.

POCKINGTON. Bunch large, berries roundish, bright golden yellow when fully mature, juicy and of good quality.

MOORES DIAMOND. A pure native, bunch large, compact berries, medium size. Vine vigorous.

For price on grapes see page 32.

STRAW- BERRIES

The first fruit to ripen in the Spring, its tempting appearance, delicious taste, and wholesomeness as a diet, have made them universally popular.

It has been aptly named the "Queen of Small Fruits." The blossoms of all varieties marked "S" are bi-sexual or **perfect**, those marked "P" are destitute of stamens and are termed pistillate or **imperfect**. Imperfect varieties should have a row of perfect flowered sorts planted every third or fourth row to pollinize their blossoms. When imperfect blossoms are profusely fertilized they are the most prolific.

Price of Strawberries:

Selected strong plants,	per 10	per 100	per 1,000
	\$0.25	\$1.50	\$5.00

BEEDEERWOOD (S). Early, a very strong yielder, and continues a long time in bearing. The fruit is good size and as firm as the Crescent.

BUBACH (P). A well known variety, noted for its large size and productiveness. Ripening in Mid-summer. Especially recommended for home use or near market.

BRANDYWINE (S). Very vigorous growing plant and productive. Medium to large berries. Ripens medium to quite late.

CRESCENT (P). Succeeds well everywhere. Plant small; berries large. Very profitable variety.

JESSIE (S). The Jessie is one of the old standard varieties. We have grown it for many years. The berry is large, bright colored, of a good quality.

HAVERLAND (P). Exceedingly productive. Fruit large and fine. One of the most popular of the well-tested varieties.

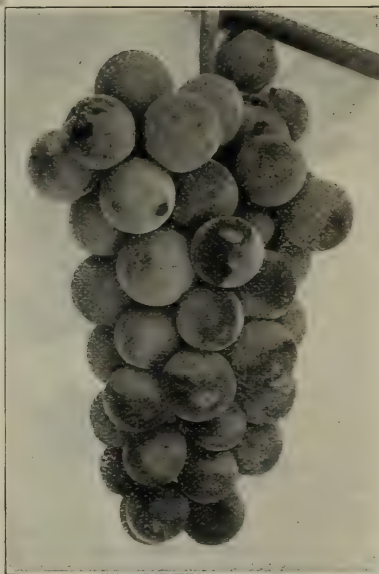

PARKER EARLE (S). A very productive berry if all conditions are favorable. It must have very rich soil and plenty of moisture to mature its crop.

SENATOR DUNLAP (S). A variety that seems to give general satisfaction all over the country. Very productive. Large berry. Very dark red. A profit maker.

WARFIELD (P). Very productive. Berries quite large. Desirable as a canning berry.

BISMARCK (S). Very productive. Berries quite large. Good pollinizer.

PRUNING AND SETTING. Before setting the plants cut the roots back, leaving them from four to five inches long, in the case of dormant plants. But should you defer setting until late in season, when the plant has started new feeding roots, then merely cut off the tip ends of the roots, just enough to even them up.

Brighton Grapes.

Senator Dunlap.

Special Offer No. 125.

25 Plants each of four varieties from above, 100 plants in all, our selection. Fine strong plants.

Price \$1.10.

Industry Gooseberry.

Red Dutch Currants.

GOOSEBERRIES.

Should be planted in a good rich soil and well manured once a year. Even more rugged and easier grown than Currants, and certainly should be given a place in every garden. Do not let bushes grow too thick; the fruit will be larger and more plentiful. We offer only the best tested varieties that will do well anywhere.

Price: Each per 10 per 100
Strong 2 yr. plants\$0.25 \$2.00 \$15.00

INDUSTRY. Large, one of the best; fruit red, smooth and juicy.

DOWNING. Large, light green; soft, tender, good flavor extremely vigorous, hardy and prolific.

HOUGHTON. Most productive; best payer of all, yield easily 700 bushels per acre; fruit excellent quality.

RED JACKET Fruit large, red. One of the finest in cultivation.

Hill's "Suburban" Collection. Special Offer No. 126. Price \$2.50.

Hill's 25 best "Small Fruit" plants. All big strong and healthy. Enough fruit for a small home. Will pay for itself many times over the first season.

CURRANTS.

Hardy, easily cultivated, standing neglect well, and liberally responding to cultivation and generous treatment; indispensable for table use, jellies, etc. No garden is complete without them. Set four feet apart in rich ground. If the currant worm appears, dust with hellebore. All 2 year plants well rooted and strong.

Price: Each per 10 per 100
2 year No. 1\$0.20 \$1.75 \$15.00

PERFECTION. Very large bright red; a great bearer. The Perfection has a long stem, making it easy to pick. Excellent for jell, jams, etc.

RED DUTCH. Well known old variety, very productive; excellent quality.

VICTORIA. Red, long bunches, very productive. One of the best.

WHITE GRAPE. A white currant. Berries large. very productive. Sweet and mild, excellent for table use.

WHITE DUTCH. A white currant. Well known old variety of excellent quality.

BLACK CHAMPION. The leading well tested Black Currant, very productive. Excellent quality; strong grower.

RASPBERRIES.

Plant 4 feet apart each way.

Price: Each per 10 per 100
Strong roots\$0.15 \$1.00 \$6.00

CUTHBERT. (Red) A strong hardy variety. Berries large; excellent quality. One of the best.

COLUMBIA. (Red) Berries of good size and flesh very firm. Excellent for market and canning purposes; productive.

KANSAS. (Black Cap) A valuable variety. Extra hardy; berries large. A good shipper.

GREGG. (Black Cap) Old reliable market variety. Fruit large.

BLACKBERRIES.

Price: Strong roots, each \$0.15; per 10 \$1.00; per 100 \$4.00.

SNYDER. One of the best. Berries juicy and sweet. Large and productive.

ANCIENT BRITON. Another hardy variety. Ripens after the Snyder.

ASPARAGUS.

Very profitable and easily grown.

Price: Strong roots, each \$0.10; per 10 \$0.50; per 100 \$2.00

CONOVERS COLOSSAL.

Produces large tender shoots. Delicious, healthful and easily grown.

COLUMBIA MAMMOUTH.

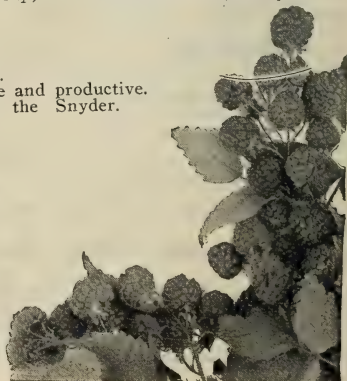

A variety of mammoth size. One of the best. Early.

RHUBARB.

Price: Each per 10 per 100
Strong roots\$0.15 \$1.25 \$8.00

LINNEUS. Early and tender. Excellent for pies.

GIANT. Fine quality. Best for canning. Good keeper.

PLANT FOR PROFIT.

Owing to the widespread interest in forestry and wood-lot planting and the enormously increased demand for valuable native forest species, our facilities for producing forest-tree seedlings has increased from year to year, until now our annual output consists of many millions of plants. Not only are the large Lumber and Railroad companies planting on a large scale, but farmers, and landowners all over the country are rapidly beginning to realize that the establishing of woodlots or shelter-belts is just as important as the raising of staple crops, and the profits larger and surer. The prevailing opinion that you have to wait generations for returns is false. Many plantations planted six and eight years ago are already a source of big revenue to their owners, and growing more valuable each year, and cases are on record where groves of five years standing have produced fence posts in quantity sufficient to liquidate the original investment many times over, and then the grove was only thinned out here and there. Nor does it entail any great expenditure of money to establish a woodlot or grove of say one acre in extent. By planting the seedlings 6x6 feet apart each way, 1210 trees will be required. The planting can be accomplished economically. From data gathered from reliable sources we find that the average man can plant 1000 trees per day, where the ground is in good condition and the soil prepared as for corn and marked out, and where the land is rougher and harder to work, 500 to 900 trees per day would be the average. Their care after planting is a small item, requiring only frequent cultivation same as corn for the first few seasons. It will be seen therefore that groves or woodlots can be established at a cost considerably less than \$15.00 per acre. According to the variation in cost of the different varieties of seedlings.

Catalpa Speciosa.

The Catalpa Speciosa is preeminently the fastest growing variety known, that has a high value as timber. They will grow, if planted on good soil and well tended while small, nearly one inch in thickness each year of their growth. The practical value of this tree is certainly not overestimated. Notwithstanding its quick growth its timber has been proven, by actual tests to be more durable than a good many of the slow growing hardwoods. The reason for this, authorities state, is that the Catalpa has the peculiar power of absorbing those substances from the soil which in concentrated form, resists the microbes of decay. When you stop to consider the enormous amount of money expended annually by farmers renewing rotted fence posts, or by railroad companies and other large corporations in chemical treatment of wood for cross ties to increase its durability, it is easy to see why the Catalpa Speciosa, whose wood is absolutely rott resisting, has jumped so quickly into favor, and why it is almost impossible for growers to supply the immense demand for seedlings. On account of the prominence given this variety by several of the leading Agricultural papers, not only have thousands of small groves or wood lots of one or more acres in extent been established, but many large commercial plantations of from 300 to 600 acres have been planted out. These have proven excellent investments, and in many cases large profits have been realized as early as four or five years after planting. Our seedlings this season are of extra quality, strong and stocky, are graded to the following sizes and tied in bunches of 100 each.

Price:	Seedlings	100	1,000	10,000
6 to 12 inch	\$0.75	\$ 3.50	\$30.00
12 to 18 inch	1.00	5.00	45.00
18 to 24 inch	1.25	6.00	55.00
2 to 3 feet	1.50	7.00	65.00
3 to 4 feet	2.00	10.00	

BLACK LOCUST. Another variety possessing high value for timber and fuel. Can be grown successfully over a wide range of territory. A high point in its favor is that it succors from the root, therefore a grove of Black Locust is permanent. In point of popularity it is next to the Catalpa Speciosa.

Price:	Seedlings	100	1,000	10,000
6 to 12 inch	\$0.50	\$2.50	\$20.00
12 to 18 inch75	3.50	30.00

2 to 3 feet	1.25	7.00	65.00
3 to 4 feet	1.50	9.00	

RED OAK. The most valuable of the hardwood species, and is now being planted in large quantities for railway ties. Is a comparatively fast grower and the most valuable tree of the entire Oak family.

Price:	Seedlings	100	1,000	10,000
6 to 12 inch	\$1.00	\$7.00	\$65.00

Hill's Special Forestry Offer.

Sufficient trees for a two acre wood lot.

1000 Catalpa Speciosa	1 yr. seedl.	6 to 12 inch
1000 Black Locust	1 yr. seedl.	12 to 18 inch
500 Red Oak	1 yr. seedl.	6 to 12 inch
100 American Elm	1 yr. seedl.	10 to 12 inch

Price \$10.00.

Other Valuable Varieties.

Suitable for forestry and woodlot planting, firewood, stock shelters, etc.

AMERICAN ELM. This is one of the hardiest trees for prairie planting, and a rapid grower. The wood is extremely valuable for the manufacture of agricultural implements.

Price:	Seedlings	100	1,000	10,000		100	1,000	10,000
10 to 12 inch	\$1.00	\$4.00	\$37.50	18 to 24 inch	\$1.50	\$6.50
12 to 18 inch	1.25	5.00	50.00	2 to 3 feet	2.00	15.00

HARD OR SUGAR MAPLE. This is primarily a shade and ornamental tree. Its rate of growth is rather slow, but it grows to a large size, develops a splendid head, and lives to a great age. The wood of the Sugar Maple is used in large quantities for flooring and interior finish and in the manufacture of woodenware, spindles, and novelties. It has a high fuel value and produces high grade charcoal. Maple Sugar is almost the exclusive product of this tree.

Price:	Seedlings	100	1,000	10,000
6 to 10 inch	\$1.00	\$8.00	\$70.00

EUROPEAN LARCH. This is an extremely valuable tree. A very rapid grower and much used for planting along fence lines, because it quickly grows up into a living post, and lasts a lifetime, and forms at the same time a valuable windbreak. Good results are also obtained by planting in groves, planting the trees 6x6 feet apart each way. An acre of European Larch in from five to eight years will pay for itself many times over, from the thinning alone. Grows 75 feet in height.

Price:	Seedlings	100	1,000	10,000		100	1,000
6 to 10 inch	\$1.25	\$10.00	\$90.00	10 to 12 inch	\$1.50
							\$12.00

AMERICAN BEECH. One of the most valuable of all our American native species. Planted largely in the Eastern States. Grows to large size and the wood is used for numerous purposes.

Price:	Seedlings	100	1,000	10,000
10 to 15 inch 1 year	\$1.50	\$12.00	\$110.00

EUROPEAN BEECH.	Price:	Seedlings	100	1,000
	6 to 12 inch	\$1.50	\$10.00

WHITE ASH. Very fast grower and wood of great economic value. Its most valuable quality is strength, elasticity and these combined with its ability to take a good polish and to season without injury make it a timber of first rank.

Price:	Seedlings	100	1,000	10,000
6 to 12 inch	\$1.00	\$6.00	\$55.00

BLACK WALNUT. Grows rapidly and is one of the most valuable woods found in America, being used largely for interior finishings, etc. This timber is now very scarce. The nuts are much sought for and find ready sale.

Price:	Seedlings	100	1,000	10,000
12 to 18 inch	\$1.50	\$9.00	\$90.00
18 to 24 inch	1.75	12.00	110.00

AMERICAN LINDEN OR BASSWOOD. Wood makes good lumber and is much used for paper-pulp. Fast grower.

Price:	Seedlings	100	1,000	10,000
12 to 18 inch	\$2.00	\$20.00	\$180.00

SOFT MAPLE.

Price:	Seedlings	100	1,000

YELLOW BIRCH.

Price:	Seedlings	100	1,000
10 to 15 inch	\$1.50	\$12.00

The Value of Windbreaks and Woodlots. The value of Windbreaks and Woodlots, especially if located on the open prairies, can never be too highly emphasized. Trees are an important factor on any farm where they exist, and could be made of equal value on thousands of others. It has been proven that fields surrounded by trees, yield larger crops than they would otherwise because they retain the moisture in the soil, by acting as Windbreaks. At the same time they will also furnish wood for fuel and fence posts. Many think that the planting of a few thousand trees is a great deal larger task than it really is. One man can plant out several hundred trees a day. Some imagine the cost would be excessive, where as seedling of a suitable size for planting can be obtained at a very reasonable figure. A Winbreak or Woodlot composed of more than one specie is usually the most effective, and the list above includes only those varieties which do well generally in all parts of the country, and which have high timber value.

American Arbor Vitae Hedge.

Hill's Hardy Hedge Plants.

Hedges have long held the center of the stage in all garden and lawn plantings and well do they deserve this honor, for their beauty and utility is apparent to everyone, and their uses are manifold. Seldom if ever is a definite scheme of planting carried out that does not include the use of hedges either for ornamental effects, boundary line, shelter, live fences, or simply for walk or driveway border. Their use is everywhere considered the one most attractive and economical method that can be employed in ornamenting the home grounds. Indeed, so popular are they that it has become almost impossible to grow enough to meet the great demand. Being of easy culture after planted out and of quick growth, a perfect hedge can be obtained in a surprisingly short time by the use of any of the varieties named herewith. No grounds are so small that they should not include the use of a hedge or border of some sort.

AMERICAN ARBOR VITAE.

For years a general favorite and everywhere considered the best Evergreen hedge plant in existence. Its main features are, absolute hardness, adaptability to shearing, and attractiveness of foliage, and surely the latter is not the least, as the foliage of the Arbor Vitae, with its beautiful spray-like branches, is surely one of the most beautiful sights imaginable, especially in the Winter, when the green foliage of leafy trees and shrubs have fallen off. By shearing freely, it can be kept low and dense, or trained to high form just as may be desired. The Arbor Vitae has so many good features, that it is easily the "leader" in the list of Evergreen hedges. It is planted with entire success in any part of the country. It is easily cared for, and its beauty enhances as it grows older.

Price:	Transplants	10	50	100
	10 to 12 inch\$0.75	\$2.50	\$4.00
	1 to 1½ feet1.00	3.50	6.00

HEMLOCK.

Nothing in our opinion is so peculiarly graceful and beautiful as a well kept Hemlock Hedge. Either as an ornamental boundary, or for a protective screen, no other Evergreen can equal it in grace and beauty. Hemlock resembles very closely the famous old yew hedges of England, retaining a green and cheerful appearance throughout the whole year. It is easily cared for, and its beauty enhances as it grows older, eventually forming an absolutely impenetrable barrier, thick, bushy and symmetrical. It is not uncommon to see Hemlock Hedges 35 to 50 years of age and indeed their highest point of beauty is reached at that time. It is hardy everywhere, never winter kills, and grows moderately fast, necessitating the use of shears every year for the first several years and thereafter every other year.

Price:	Transplants	10	50	100
	6 to 10 inch\$2.00	\$8.00	\$15.00

DIRECTIONS FOR PLANTING AND CARE OF HEDGES.

After determining the location of the hedge, the strip of ground should be spaded over deeply, for a width of two feet, and the plants placed in the center of this pulverized strip. The proper distance apart for the plants will be determined by their size. Plants, up to 1 to 1½ feet tall, 1 foot apart; plants 1½ to 2 feet and 2 to 3 feet, should be set eighteen inches apart. Cut back severely as soon as planted all hedge plants, except Evergreens, which should not be touched with shears the first season. The second year the plants ought to make a good growth and a clipping during the Summer, during the months of May or June, will be necessary. If inclined to grow strongly, more frequent trimming than once a year will be beneficial as it should always be the aim to produce a mass of foliage, especially at the base of the hedge. It is well to keep in mind, especially in regard to Evergreen hedges, that for the first two or three years the shearing should not be severe, as the object is to encourage and not weaken the growth. The most commendable form to trim a hedge is with sides rounded instead of perpendicular, and with oval top, not flat or horizontal. By so doing the side and top branches are exposed equally to the sunshine and rain and a more symmetrical hedge will be the result.

HEDGES, WINDBREAKS, SHELTERS AND LIVE FENCES. By E. P. Powell. A treatise on the planting, growth and management of hedges for country and suburban homes. It gives accurate directions concerning hedges, how to plant and how to treat them; especially concerning windbreaks and shelters. It includes the whole art of making a delightful home, giving directions for nooks and balconies.
140 Pages, 5x7 inches, Cloth.....50 cents.

AMOORE RIVER PRIVET.

Preeminently the best variety in existence for hedge purposes, and leader in the class of deciduous hedges. It is recognized the world over as the "Ideal Hedge Plant." A remarkably vigorous grower, compact and regular in form, with glossy wax-like foliage of bright green color. It thrives in all kinds of soils and situations, enduring equally well shade and sun, smoke and dust. In the south it is practically Evergreen, retaining its beautiful green leaves all Winter. Can be sheared and trimmed readily to any desired form and is entirely free from disease or insect attack. An extremely fast grower, forming a beautiful hedge in two seasons, and one of the easiest varieties to transplant on account of their wonderful root system. It is a variety notable because of absolute hardiness even in cold northern climates, and it is due to this fact perhaps more than any other, that it jumped so quickly into favor upon its introduction several years ago, and its popularity has steadily increased each year until undoubtedly it is now planted more extensively than any other variety offered. It seems to grow with entire success in all parts of the country, both North, East, South and West, and all who see it at once become enthusiastic in their praise of this wonderful hedge plant.

Transplants	10	50	100
1½ to 2 feet\$1.50	\$5.00	\$8.00

JAPANESE BARBERRY.

Of all Deciduous Shrubs, this we believe, is the most valuable for making low hedges. Of Japanese origin and of rather dwarfish habit of growth, low, regular and compact, requiring very little pruning. It has fine thorns and small round green leaves that change color in Autumn to a brilliant fiery crimson. Creates one of the most beautiful hedges imaginable and is made still more beautiful by great numbers of pretty drooping yellow flowers which are followed in the Fall by bright red berries in great clusters which adhere to the branches throughout the Winter. It

is used extensively for inside decoration, for it certainly is one of the most delightful berried shrubs on the list. This Barberry is absolutely hardy, of the easiest culture, and will grow in any soil or situation. It will stand considerable shade and can be grown under trees if not planted too closely to the trunks. It is of slow compact growth, but will eventually attain a height of five or six feet. See color reproduction on cover.

Price: 1 to 1½ feet, Transplants, per 10 \$2.00; per 50 \$8.00; per 100 \$15.00

CALIFORNIA PRIVET. The old reliable hedge plant and decidedly popular. Forms beautiful, symmetrical live fences of great density. In middle and southern states where largely planted it retains its beautiful shining green leaves nearly the entire year. It is a rapid grower and untrimmed grows 8 to 12 feet tall, but is easily kept to any desired height or shape by shearing and soon forms a solid mass of foliage.

Price: 1½ to 2 feet, Transplants, per 10 \$1.50; per 50 \$5.00; per 100 \$8.00

AMERICAN WHITE SPRUCE.

This variety forms an unusually attractive hedge as will be seen from illustration and is particularly to be recommended for use in exposed situations. Its dense compact form shuts out the coldest of Winter winds, and its foliage which keeps green all season is particularly cheerful in Winter. Fast grower, and prunes very easily, soon forming a dense heavy hedge. Becoming more popular each season.

Price:

Transplants	10	50	100

White Spruce Hedge.

FOUR GRAND JAPANESE NOVELTIES

RARE IMPORTED STOCK JAPAN MINIATURE TREES

Japanese Dwarf Tree

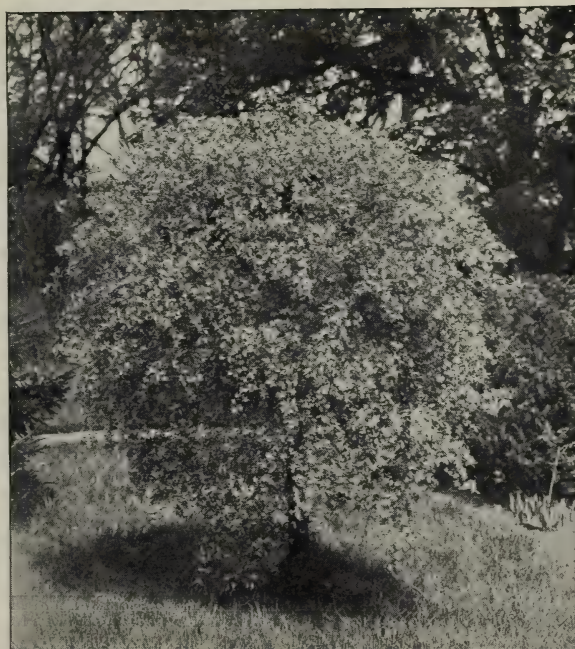

The secret of propagating these wonderful little trees is known only to the Japanese. They live to be centuries old. Our imported stock comprises the greatest number of forms and sorts. They come in quaint Japanese pots. See illustration.

These small trees are very beautiful as table pieces or for balconies, terraces, etc., and are not surpassed in delicate grace by any plant. Of easy culture; should be kept warm in sunny, airy situation. Water sparingly once a day during Summer. **Price, \$1 each.**

BEAUTIFUL JAPANESE MAPLES

These beautiful Japanese Maples are among the rarest and most low-growing trees we have for door-yards, lawns and park planting. Highly valuable on account of their neat, compact growth and wonderfully bright-colored foliage,—Spring, Summer and Fall,—deep blood-red, rich crimson scarlet, golden yellow, etc. They make nice bushy little trees, and being scarce and difficult to propagate the price is always high. Seen in all the finest places. We offer the cut-leaved variety, deep red in color. **Price, 2 to 3 feet, \$1.50 each, \$12.50 for 10.**

JAPANESE WEEPING CHERRY. Most beautiful of all weeping trees. Graceful, drooping branches, literally covered with delicate white blossoms, giving us the handsomest and most picturesque of all flowering trees. Thrives on any soil and requires no care other than a good mulch during the winter months. When in blossom, this tree appears like a huge bank of snow, so profusely do the blossoms hang from the slender branches. We take pleasure in being able to furnish these fine trees to our friends and customers. Every tree is grafted and receives careful attention that all may grow to perfect form. Even when grafted on tall stems, its slender branches sometimes sweep the grass in graceful garlands. **Price, 4 to 4½ ft. stems, \$2 each.**

Japanese Weeping Cherry.

JAPANESE ROSE-FLOW-ERED CHERRY. This is the most remarkable variety of flowering cherry ever produced in Japan. Remarkable for the softness and exuberance of its flowers, blooming in the warm pleasant Spring days. The exquisite blossoms are borne in great abundance, completely covering the tree. The foliage is delightful.

Their proper place is on the lawn, where they show up to fine advantage in contrast to the green. Their effect in early Spring is grand beyond description, and their superior stateliness of form, splendor of growth and lavish yield of fragrant flowers, place it in the foremost rank among hardy ornamental trees and shrubs. While any good soil is sufficient to insure their growth, they succeed best in a soil which is warm, rich and dry. **Price, 3 to 4 ft., \$1.50 each, \$3.75 for 3.**

1 Japanese Maple	
1 Japanese Weeping Cherry	
1 Japanese Rose-Flowered Cherry	

TREE HYDRANGEA. A most attractive flowering shrub, growing into tree form. Straight, clean stem three feet tall, crowned with a mass of beautiful white flowers in midsummer. Very desirable for lawn planting and grows more beautiful every season, spreading and enlarging its crown, reaching six feet in diameter, bearing hundreds of flowers at one time. **Price, 3 to 4 feet, 75 cts. each, \$2.10 for 3.**

PLANTING ADVICE DEPARTMENT. This department is open to everybody interested in the culture of Trees, Shrubs and Plants, and the service is entirely free of charge. Any one wishing advice or help on anything pertaining to horticulture—not covered by any of the numerous articles herein, is cordially invited to write us. Our aim is to make this book a manual and authoritative reference, but where space is limited, we are more than glad to supply further detailed information by letter. Address your inquiry (in separate letter from order) to D. HILL, Planting Advice Department, Desk 10, Dundee, Ill.

NOVELTIES AND SPECIALTIES

IN

HILL'S CHOICE SELECT TREE AND SHRUB SEEDS

Seeds of trees and shrubs as a general rule should be planted during the months of April, May and June, same as garden or flower seeds, and their culture is almost identical, great care being necessary to see that the seed is not planted too deep. The seed comes best when planted in rich, sandy loam, and the plants should be naturally or artificially sheltered from heavy east and northeast winds.

Free Delivery By Mail.—All seeds ordered at the packet, ounce or pound prices will be sent by mail, **postage prepaid by us**, to any address in America.

All seeds are carefully tested. Our aim is to make **quality** the first consideration, our half century's reputation being behind these seeds, just as it is back of our trees and plants, and we earnestly solicit a share of your kind orders for 1910.

Norway Spruce.—This is a variety of inestimable value, for it grows into large beautiful trees admired by everybody, and serve as wind-breaks or can be planted on lawns for shade, ornament, &c. Grows quickly into big trees with luxuriant foliage. This is the variety so popular for Christmas trees. Price per package 5c; per oz. 15c; per $\frac{1}{4}$ lb. 50c; per lb. \$1.65.

Box Elder.—A wonderful variety and popular because of its quick growth and drought enduring qualities. It grows freely, and can be planted anywhere. Price postpaid—per package 5c; per oz. 8c; per $\frac{1}{4}$ lb. 20c; per lb. 60c.

Scotch Pine.—A variety almost without equal for the west and northwestern States. It is entirely hardy, of quick and sturdy growth, and does not require much rich soil as some varieties. Grows to large size, 60 to 80 feet tall and is very ornamental. Price postpaid—per package 10c; per oz. 35c; per $\frac{1}{4}$ lb. 80c; per lb. \$2.50.

White Birch.—Of unsurpassed attractiveness, and on account of its beautiful growth and paper-like bark, it is extremely popular. It can be planted on lawn, and is much used on farms, for planting around fields, &c. Price postpaid—per package 5c; per oz. 10c; per $\frac{1}{4}$ lb. 25c; per lb. 95c.

White Pine.—The most useful and ornamental variety planted to-day. It has the greatest timber value of all and is used extensively for reforestation purposes. A fast grower and perfectly hardy. Price postpaid—per package 5c; per oz. 15c; per $\frac{1}{4}$ lb. 50c; per lb. \$1.95.

Paper Birch.—A delightfully attractive tree and easily grown from seed. The bark is creamy white and paper-like—hence its name. Price postpaid—per package 10c; per oz. 30c; per $\frac{1}{4}$ lb. \$1.00.

European Larch.—A variety which has become very popular. A quick grower, and satisfactory in every way. Good for timber, and develops into large trees 80 to 100 feet high. Price postpaid—per package 10c; per oz. 20c; per $\frac{1}{4}$ lb. 65c.

Black Birch.—Another member of the Birch family, and favorably known because of the fact that it will grow on low lands and along rivers, creeks, &c. Price postpaid—per package 5c; per oz. 10c; per $\frac{1}{4}$ lb. 30c.

Austrian Pine.—Very valuable, especially in the west and northwest. Price postpaid—per package 5c; per oz. 15c; per $\frac{1}{4}$ lb. 50c; per lb. \$1.75.

Catalpa Speciosa.—One of the very best timber trees in existence to-day and is being more widely planted than ever. Grown easily from seed, and will attain a height of

from 3 to 8 feet in two seasons, and on rich soil it will grow to form three large fence posts in four to five seasons. A really remarkable tree, worthy of its popularity and should be planted by everyone. Price postpaid—per package 5c; per oz. 15c; per ¼ lb. 50c; per lb. \$1.85; per 10 lb. (by express) \$16 00.

Dwarf Mt. Pine.—Of dwarfish habit, round and bushy, and perhaps the rarest of all conifer trees. Certainly it is the most valuable dwarf tree of all. It is of foreign origin, but grows well everywhere. Price postpaid—per package 10c; per oz. 25c; per ¼ lb. 85c.

Citrus Trifolata.—Or Hardy Orange. Wonderfully productive and a very successful grower. Price postpaid—per package 10c; per oz. 25c; per ¼ lb. 85c.

Swiss Stone Pine.—Ont of the best of the pines. Originated in Switzerland. Very rare. Price postpaid—package 15c; per oz. 25c.

Persimmon.—Bears a very luscious fruit, and is very popular. Has luxuriant foliage. Price postpaid—per oz. 25c.

Nordman's Fir.—Belongs to the fir family and one of the most beautiful of all. Has dark green foliage, making it a pretty tree for lawn. Price postpaid—per package 15c; per oz. 30c.

Blue Spruce.—Has sparkling gorgeous blue foliage, and the most ornamental tree that grows. Should be on every lawn. Price postpaid—per package 10c; per oz. 25c; per ¼ lb. 90c.

Russian Olive.—A fine hardy, popular tree and very ornamental. Forms a dense bush. Price postpaid—per package 10c; per oz. 20c.

White Ash.—Very popular in all parts of the country, but especially so in the west. Very valuable and fast, strong grower. Price postpaid—per package 5c; per oz. 10c; per ¼ lb. 15c; per lb. 50c; per 10 lb. (by express) \$4.00.

Pinion Pine.—A very pretty little tree which grows wild in the Rocky Mountains. Hardy and very ornamental. Price postpaid—per package 5c; per oz. 10c; per ¼ lb. 25c; per lb. 50c.

Hemlock Spruce.—per package 10c; per oz. 20c; per ¼ lb. 75c.

Black Hill Spruce.—per package 20c; per oz. 50c; per ¼ lb. \$1.50.

Concolor Fir.—per package 5c; per oz. 15c; per ¼ lb. 50c.

White Spruce.—One of our best native species and very hardy and popular; price postpaid—per package 15c; per oz. 25c; per ¼ lb. 90c; per pound \$3 00.

Red Cedar.—Per package 5c; per oz. 10c; per ¼ lb. 35c; per lb. \$1.10.

Red Spruce.—Per package 10c; per oz. 15c; per ¼ lb. 50c.

Pitch Pine.—Per package 5c; per oz. 10c; per ¼ lb. 60c.

Taxus Baccata.—(Japanese Yew). A very scarce and wonderful variety. One of the most beautiful trees in existence. Per package 15c; per oz. 25c; per ¼ lb. 95c.

Taxus Cuspidata.—(Yew). Per package 10c; per oz. 20c; per ¼ lb. 75c.

Honey Locust.—Per package 5c; per oz. 10c; per ¼ lb. 30c.

Black Locust.—Per package 5c; per oz. 10c; per ¼ lb. 20c; per lb. 60c.

Russian Mulberry.—A free grower and bears luscious fruit, which is eagerly eaten by fowls and pigs. Fruit has sub-acid sweet taste and is very delightful. Price—per package 10c; per oz. 35c; per ¼ lb. \$1.00.

Sycamore.—A fine shade tree and a strong, fast grower. Price—per package 5c; per oz. 15c; per ¼ lb. 50c.

Wild Black Cherry.—Grows into large trees and in summer are literally covered with dark, delicious fruit. Price per package 5c; per oz. 10c; per ¼ lb. 35c; per lb. \$1.

European Linden.—Per package 10c; per oz. 15c; per ¼ lb. 50c.

American Linden.—Per package 10c; per oz. 15c; per ¼ lb. 50c.

Red Oak.—Per oz. 5c; per ¼ lb. 15c; per lb. 25c. By express, 10 lb. \$1.00; per bushel 50 lb. \$3.50.

Wayfaring Tree.—Very rare and beautiful—per package 15c; per oz. 25c.

Purple Barberry.—Fine hedge plant—per package 10c; per oz. 20c; per ¼ lb. 75c.

Kentucky Coffee Tree.—Package 5c; oz. 15c; ¼ lb. 40c.

Order Sheet For Special Offers

You are almost sure to want some of these special value collections, which for your convenience in ordering we have numbered (see Catalog and Bargain Sheet.) *These are Money Saving Sets.* Please order by **NUMBER OR NAME** and carry out price as shown below.

[illegible]

GLANCE OVER THIS LIST **BEFORE MAILING**
and see if there is not something here that you want and have omitted to include in your order:

EVERGREENS—Hill's Evergreens are known the world over, and famous for their hardiness. Largest grower and best selection in America. For detailed description of each variety see pages 4 to 16.

SHADE AND ORNAMENTALS—Have you provided for a row of trees on your treebank, or some shade trees for the lawn? See pages 16-21.

ORNAMENTAL FLOWERING SHRUBS—A necessity in beautifying your grounds these for the corners of your lawn and borders of your drive. See pages 23 - 27. There is nothing as fine as

VINES—"Nature's Drapery" and very inexpensive. Our assortment is complete. See page 27.

ROSES—Have you climbers for your porches and archways as well as the beautiful bush roses? Why not have your own rose bed? Their culture is easy and a pleasure. See pages 28 - 31.

FRUIT TREES AND SMALL FRUITS—Does any one near you grow fruit for the home market? If not why not you? The profits are large and the work pleasant. See pages 31 - 37.

FOREST TREE SEEDLINGS—Turn to pages 35 - 36 and note the profits to be derived from planting a single acre of trees for fence posts.

HEDGE PLANTS—Every place should have a hedge of some sort. Nothing is more effective and pretty. See pages 37 - 39.

Hill's 50 Great Bargain Sheet—Don't overlook these wonderful offers. Note especially lists 48 and 51.

If you order these things now, it may save you loss of extra time, trouble and expense of sending in two orders. It pays to order all you want while you are about it.

While making out your order we would appreciate it if you would send the names and addresses of some of your friends who you think would be interested in Hill's Splendid Offers. Use separate sheet for this.
